[OE. *brecan* (*bricþ*, pa. t. *bræc*, *brǽcon*, pa. pple. *brocen*), corresp. to OFris. *breka*, OS. *brekan*, (MDu., Du. *breken*), OHG. *brehhan* (MHG., mod.G. *brechen*), Goth. *brikan* (pa. t. *brak*, *brēkum*, pple. *brukans*):—OTeut. stem *brek-*, corresp. to L. *frag-* (*frang-o*, *frēgi*, *frac-tum*), Aryan **bhreg-*. The original short vowels of the present stem and pa. pple were lengthened in ME., though *breck*, *brick*, and *brocken* are still retained dialectally. The normal pa. t. *brak*, *brack* (= OE. *bræc*, Ormin's *bracc*), remains in the north; the normal plural in ME. was *brēken*, *brecke,n*, which would have become *breake* in 16th c.; but by the operation of levelling, we find also a ME. sing. *brēk*, *break*, and a (north.) pl. *brak*, *brack*; a pl. *braken* occurs in Layamon, and in late ME. *brāke* became the regular form both in sing. and pl., which, being retained in the Bible of 1611, is still familiar as an archaic form. But early in the 16th c., if not before, *brake* began to be displaced by the modern *broke*, formed after the pa. pple. Of the pa. pple., *broken* is still the regular form, but from the end of the 14th c. this was often shortened to *broke*, which was exceedingly common in prose and speech during the 17–18th c., and is still recognized in verse.]

(Many of the uses of this verb are so contextual, that it is difficult, if not impossible, to find places for them in a general scheme of its signification: when not found here, they may be sought under other words of the phrase.)

Breast (brest). Forms: 1–4 **breost**, 3–8 **brest**; (also 4 *Kent* **bryest**, 4–5 **breest**, **breste**, 4–6 *north.* **breist**, 5–6 **brist**, **birst**). 6 **breast**. [OE. *brēost* = OFris. *briast*, OS. *briost*, *breost*, ON. *brjóst*, (Sw. *bröst*, Da. *bryst*) neuter, answering to an OTeut type **breusto(m)*: represented in Goth. by *brusts* fem. pl. (no sing.):— OTeut. **brust-s* consonantal fem., 'prob. originally inflected as a dual' (Kluge), whence OHG. (MHG., mod.Ger.) *brust* fem., MLG. (MDu., Du.) *borst* fem. (with metathesis of *r*). The term is confined to Teutonic, there being no common Indo-Europ. name for the breast. As to the form and derivation, see below. OE. *ēo* became normally ME. *ē*, *ee*, mod. *ee* (*i*), and in Sc. and north dial. *breast* rimes with *priest*; but in Standard Eng., the *e* has been shortened before the two consonants; the spellings *breast* and *brest* run side by side from 16th to 18th c.; in current usage we spell *breast* and pronounce *brest*.

The difference of vowel in OTeut. **brust-*, **brust-* is explained by the fact that all monosyllabic consonantal stems had originally shifting stress, with corresponding ablaut (**brust-s*, **brust-ôz*); the neuter gender in OE., OS., and ON. by the supposition that **brust-s* was orig. inflected as a dual (the two breasts) of which the nom. and acc. **brustô* would later become **brust*, *brēost*, which after the loss of the dual would naturally be treated as neuter pl., as in other known instances. Even in senses 2, 5, the plural was usual in OE., as exclusive in Gothic. **Brust-* cannot be connected with *berstan*, *brestan* to burst: but it may be related to the OS. verb. *brustian* to bud, and be a root-noun from a vb. **brust-an* (see Lexer under *brust*), a specialized derivative of **brut-an* (i. e. **brut-stan*, **brēstan*; cf. **brēh-stan*, *brestan*, *t. brek-an*). The 'breasts' would thus be orig. the *mamma* or paps, likened to 'buds' or 'sprouts'. See further Kluge *Beiträge* VIII. 510.]

I. 1. Each of the two soft protuberances situated on the thorax in females, in which the milk is secreted for the nourishment of their young; the mamma; also the analogous rudimentary organ of males, the mammilla. [OE. *brǽw, brǽaw*, Anglian **brǽw, brǽg, brǽg*, masc. 'eye-lid'; according to Sievers, an *i*- stem, OTeut. type **brǽwi-, brǽhwi-*; cf. OFris. (*ag*) *brē*, neut.: the corresponding word elsewhere is a fem. *ō*- stem, OS. *brāwa, brāha* (LG. *braue*, MDu. *brauwe*, Du. *wenkbraauw* eyebrow), OHG. *brāwa, brāa, brā*, eye-lash (MHG. *brāwe, brā*, Ger. (*augen-*)*braue* eye-brow, also *-braune*, a modern corruption from the pl. *brāwen, brauen, braun*), ON. *brá, brá* eye-lid:—OTeut. **brǽwō*, from **brǽhwō*. The Gothic **brēwa, *brēhwa* is not preserved; but cf *brahw* 'blink, twinkle', *in brahwa augins* 'in the twinkling of an eye'. This points to a radical sense 'blinker, twinkler' as a name of the eye-lid (or eye-lash), in which case this word cannot well be referred to the same root as BROW, OTeut. *brū-* 'eye-brow', as generally assumed. Yet the two words curiously interchanged in use in different langs., and at different periods; and in continental WGer. the *brū-* forms were lost, and their place supplied by forms from *brǽwō-*. The original sense of *brū-* was 'eye-brow'; in OE. extended and transferred to 'eye-lash', so that 'eye-brow' was distinguished as *ofer-brū*. The original sense of *brǽwō-* was app. 'eye-lid', as in ON. and OE., but in OHG. restricted to 'eye-lash', and thence subsequently extended and transferred to 'eye-brow' (orig. *obara brāwa*), the sense 'eye-lash' being brought down to modern times by the compound *wintbrāwa*, MHG. *wint-brā, winbrā*, mod.Ger. *wimper*. OE. had *brū* = eye-lash (*cilium*), *brǽw, brēg* = eye-lid (*palpebra*); by the 13th c. *brū, brōw* passed to the sense 'eye-lid', and *brew, breow, breȝ, bree*) to that of 'eye-brow'; the latter sense was retained by *bree* in the north, after it had in turn been taken up by *brow* in the south. From 15th to 17th c. *bree* was used by some southern writers as = 'eye-lash', a curious reversion to what had been the original OE. sense of *brū*, BROW, q. v. (The ON. cognate *brá* gave BRAE.)

(The parallelism of **brō-* and **brǽwō-* is further seen in the fact that 'eye-brows' was expressed in OHG. by *obarun brāwun, ubarbrāwo* (Graff III. 325), in OE. by *oferbrūa*, and in ME. *were breyhes, brizes aboue þe eizes, aboue breghis*. For the phonetic explanation of the late WS. form *brēaw* from *brǽw*, see Sievers *Ags. Gram.* (ed. 2) § 212, 218.]

Breeze (brīz), *sb.*2 Forms: 6-7 **brize, briese**, 7 **brize, breze, brese, breaze**, 7-8 **brees, breese**, 7- **breeze**. [In 16th c. *brize, briese*, app. ad. OSp. (and Pg.) *briza* (mod.Sp. *brisa*) 'north-east wind' (though, according to Cotgrave, *brize* also occurs in Fr. (in Rabelais *a* 1550) = *bize, bise* 'north wind'). Cf. also It. *bressa* 'cold wind bringing mist or frost' (Florio), Milanese *brisa* 'cool wind from the north' (Diez). Cotgrave's *brize* = *bize*, supports the suggestion of Diez, that the word was orig. a variant of *bisa, bise* 'north east wind'. On the Atlantic sea-board of the West Indies and Spanish Main, *brisa* acquired the transferred senses of 'north-east trade-wind', and 'fresh wind from the sea', in which it was adopted by the English navigators of the 16th c. The further extension to 'gentle fresh wind' generally, is English; cf. the actual F. *brise* (in the Dict. of the Academy only since 1762).]

†1. *orig.* A north or north-east wind; *spec.* applied within the tropics to the NE. trade wind.

1585-89 *Hawkins' 2nd Voy.* in Arb. *Garner* V. 121 The ordinary brise taking us, which is the north-east wind. 1595 RALEIGH *Disc. †2. The cool wind that blows from the sea by day on tropical coasts. (This was on the Atlantic sea-board of tropical America an east or north-east wind, i.e. a *Breeze* in sense 1; thence the name was extended to the 'sea-breeze' from any point of the compass.) *Obs.* exc as in b.

1614 RALEIGH *Hist. World* I. iii. § 8 These hottest regions of the World . . are . . refreshed with a daily Gale of Easternly Wind (which the Spaniards call the Brize). *a* 1618 — *Inv. Bretwalda (bretwǭldă). *Hist.* [OE.: occurring once in the Chronicle, where the Parker MS. (in its oldest part written *a* 900) has it thus, while the later MSS. read variously, B *brytenwealda*, C *brytenawealda*, D and E *brytenwalda*, F *brytenwald*; and twice in a charter of King Æthelstan as *brytenwalda, brytenwealda*. See below.]

A title given in the Old English Chronicle to King Egbert, and (retrospectively) to seven earlier kings of various Old English states, said to have held superiority, real or titular, over their contemporaries; also occasionally assumed by later Old English kings: its sense can only be 'lord (or ruler) of the Britons', or 'of Britain'; cf. the Roman title *dux Britanniarum*, and the *Brittonum dux* of Bede, *rector Britannie* of Æthelstan. (See Rhŷs *Celtic Britain*, Freeman *N. C.* I.)

c 855 *O. E. Chron.* an. 827 (Parker MS.) Ecgbryht..was se eahtoða cyning, se ðe Bretwalda wæs. 934 *Charter* in *Cod. Dipl.* V. 218–9 Ic Æðelstan, Ongel-Saxna cyning and Brytenwalda ealles [(a) Brytenwalda ealles] ðyses iglandes [*Latin version* (1) Ego Æðelstanus rex et rector totius huius Britanniæ insulæ; (2) Ego Æðelstanus Angul-Saxonum necnon et totius Britanniæ rex]. 1849 KEIGHTLEY *Hist. Eng.* I. 22 Some of the Anglo-Saxon Kings assumed a still higher title, that of Bretwalda or Ruler of Britains. 1855 MILMAN *Lat. Chr.* (1864) II. IV. iii. 239 Any Bretwalda or Supreme Sovereign. 1875 STUBBS *Const. Hist.* I. vi. 122 The existence of this hegemony, whether or no its possessor bore the title of Bretwalda, was not accompanied by unity of organisation.

[*Note.* It is uncertain whether the later forms are genuine fuller forms, traditional equivalents, or merely etymologizing alterations of *Bretwalda* 'ruler of the Bretts' (cf. *Ælfwalda, Ahwalda, Ealwalda* 'All-ruler, Almighty'). The element *bryten-* occurs also in several compounds, all poetic, in the sense 'far-stretching, spacious', as in *bryten-cyning, bryten-grund, bryten-rice, bryten-wang*; whence Kemble wished to explain *brytenwalda* as 'wide ruler'. But in the charter of Æthelstan, the equivalence of 'Brytenwalda ealles ðyses iglandes' to 'rector totius huius Britanniæ insulæ' shows its identity with *Britannia*. Kemble's conjectured derivation of *bryten-* from *bréotan* 'to break' is etymologically impossible; and there can be little doubt that, even in the poetic compounds, the word is simply a poetic use of *Bryten, Breoten* Britannia, or of *Breotone* (:—*brittus*) Britōnes, Britons. These compounds may actually have been formed on the model of *bryten-walda*, or, if earlier, may have had reference to the *far-reaching extent* of Britain, as compared with any single state in it; or finally, the word *breotone* Britons, may have been taken poetically for 'men', 'people', or 'nations', as apparently in *Satan* l. 687 *burg and breotone* cities and peoples or nations. It is not impossible that *Bretwalda* was suggested by a British title, such as **Brithon-uletic*, **Brython-tuledig* = Brittonum dux.]

Forms: 1 brēowan, 2–3 breowe(n, 3–5 brewen, 4–7 brewe, 4– brew, (also 4–5 breu, 4–6 bru, 4–7 brue, 5 brow-yn,-ne, br(u)wyn, 6 breawe). *Pa. t.* 1 brēaw, 3 breuȝ, 4 breuh, breu, brew; *pl.* 1 bruwon, 3 browe(n; also 3–7 brued, 4 breud, 4– brewed, 6– brew'd. *Pa. pple.* 1 (ȝe)browen, 3–4 (i-)brewen, 4–5 browe, 5 bruen, brew(e, 5–6 browne, *Sc.* browin, brouin, broune; also 4– brewed, (4 ibrowt, 4–7 brued, 4–5 breud(e, 5 brewid, 7 bru'd). [Common Teut.: OE. *brēow-an* (*brēaw, bruwon*; (*ge*)*browen*) str. vb. = OS. **briwan* (MLG. *bruwen*, MDu. *bruwen, brouwen*, Du. *brouwen*, wk.), OHG. *briwan* (MHG. *briuwen, brāwen*, mod. Ger. *brauen*) str., ON. *brugga* (Sw. *brygga*, Da. *brygge*) wk.; pointing to an OTeut. verb-root **brū* (pre-Ger. *bhreu-*): cf. OHG. *brū-hūs* 'brew-house'. Outside Teutonic, the same root is perh. to be recognized in L. *dēfrutum* new wine boiled down, and Thracian βρῦτον (= φρῦτον) beer. Cf. BROTH, and other derivatives, which show that the root *brū* had originally also in Teutonic a wider sense than 'brew', apparently that of 'make a decoction, infuse'. The strong pa. t. is found in ME. till the 14th c., and the str. pa. pple. to the 16th (the latter still in Sc.); but weak forms occur in the 13th.]

Bribe (brəib), *sb.* Also 5–6 **brybe.** [*Bribe* sb. and vb., and *brybour*, appear together in Chaucer and his contemporaries: their previous history is obscure. OF. had *bribe* in sense of 'piece of bread, frustum panis', *esp.* 'a peece, lumpe, or cantill of bread giuen vnto a beggar' (Cotgr.); the same senses occur with med.L. *briba*: see Du Cange. Cf. Walloon *brib* alms, Sp. *briba* mendicancy, It. *birba* vagabond's trade; also OF. *briber, brimber* to beg (*intr.*), be a mendicant, Walloon *bribar*, Sp. *bribar* to lead a vagabond life, be a strolling beggar, It. *birbare* 'to play the sly knave' (Florio); also OF. *bribeur, brimbeur* mendicant, strolling beggar, with Sp. *bribon*, It. *birbone, birbante* vagrant, vagabond, and the ME. *brybour*, BRIBER sense 1; also OF. *briberie, brimberie*, Roucki *briberie*, Walloon *bribrerie* mendicancy. The ulterior history is quite unknown; if the sense of OF. *bribe* is the original, the order of development would appear to have been 'piece of bread', 'alms', 'living upon alms', 'professional begging'. Hence, app. from practical association, the English sense 'to steal, plunder'. The further history in English is also involved, but appears to be somewhat thus: in *bribe* sb. the early sense of 'theft, plunder, spoil', appears to have been transferred to the 'black mail' or 'bakasheesh' exacted by governors and judges who abused their positions, and thus to gifts received or given for corrupt purposes, whence the later sense of the vb. The transition is best seen in the agent-noun *briber*, where we have the series, 'beggar', 'vagabond', 'thief', 'robber', 'extortioner', 'exactor of black mail', and 'receiver of baksheesh' (the Baconian sense). The sudden and startling change from the Baconian 'briber', who received douceurs, to the modern 'briber' who gives them, can be explained only by taking the latter as a separate derivative of the verb in its latest sense.]

† **1.** A thing stolen or robbed; theft, robbery; spoil, plunder. *Obs.* (The Chaucer quotation is doubtful: if the sb. is right, it might perh. have the sense of 'an alms', as in OF.)

c 1386 CHAUCER *Freres T.* 78 (*Harl. MS.*) Feyning a cause for he wolde han a bribe [*Petw. MS.* wold haue a brybe; 5 *texts read* he wolde brybe]. *c* 1440 *Pomp. Parv.* 50 Brybery or brybe, *manticulum*. 1580 BARCLAY *Ship of Fooles* (1874) II. 85 Theyr bowsys stuffed with brybes abhomyn[a]bly.

2. 'A reward given to pervert the judgment or corrupt the conduct' (J.).

a. The earlier sense probably regarded it as a consideration extorted, exacted, or taken by an official, a judge, etc.; i.e. as the act of the receiver: cf. BRIBER.

1535 COVERDALE *Eccius.* xl. 12 All brybes [1611 briberie] and vnrighteousnes shalbe put awaye, but faithfulnes and trueth shal endure for euer. 1580 HARVEY *Adv.* B 1217 Buying and selling of iustice for bribes. 1601 SHAKS. *Jul. Brick (brik), *sb.*[1] Forms: 5 **breke,** (*pl.*) **brikkes,** 5-6 **bryke,** 6 **brike, brikke, bryk, bryck(e,** 6-7 **bricke,** 6- **brick.** [Found only since the middle of the 15th c.; not in the *Promptorium* 1440, or *Catholicon* 1483: prob. a. F. *brique*, in OF. also *briche*; quoted by Godefroy 1264 (*briche*) and 1457 (*brique*) in sense of 'a form of loaf', and also in OF. in sense of 'broken piece, fragment, bit', and reinforcing a negative in sense 'not a bit'. Still in Burgundian and Hainault dial., in sense 'piece', *brique de pain* 'piece of bread', in Swiss Romance 'piece, bit, débris', mod.Pr. *briga* 'débris'. It would appear therefore that the OF. word was derived in some way from the Teutonic verb *brek-an* to break (cf. F. *brèche*, ONF. *breke, breque* breaking, BREACH), and that its original sense was 'broken piece', which passed through the general sense 'piece, bit', or the specific sense 'piece of bread as baked, loaf', to that of 'piece of baked clay'. In French *une brique*, the shaped object, would thus be earlier than *la brique*, the substance; but in English the earliest examples yet found are of the substance.]
1. A substance formed of clay, kneaded, moulded, and hardened by baking with fire, or in warm countries and ancient times by drying in the sun; used instead of stone as a building material.

1. A wedding feast or festival; a wedding.

(The sense 'wedding feast' is distinct in early usage; by the time of Wyclif the word was often extended to include the whole proceedings of the wedding or marriage, in which use it was often made plural (cf. L. *nuptiæ*, *sponsalia*, F. *noces*, ME. *sponsailes*, mod. *nuptials*); it is now chiefly poetic, except when used attributively (see 2).

I. As separate word.

1. A woman at her marriage; a woman just about to be married or very recently married.

The term is particularly applied on the day of marriage and during the 'honeymoon', but is frequently used from the proclamation of the banns, or other public announcement of the coming marriage. In the parliamentary debate on Prince Leopold's allowance, Mr. Gladstone, being criticized for speaking of the Princess Helen as the 'bride', said he believed that colloquially a lady when engaged was often called a 'bride'. This was met with 'Hear! hear!' from some, and 'No! no!' from others. Probably 'bride elect' would have satisfied critics.

[OE.: WS. *brǽr*, Angl. *brēr*, of unknown origin. The direct representative of the OE. and ME. word is *brere*, still usual in the dialects, and retained by the poets from Chaucer and Spenser. The rise of the variant *brier* in the 16th c. is not easy to account for, especially as the spelling *bryer* shows that this never rimed with *byer*, *tier*, but with *dyer*, *crier*. But the phonetic change was exactly parallel to, and contemporaneous with that of ME. *frere*, *freyre*, to *fryer*, *frier*, Friar. *Briar* is a later variant (cf. *hier*, *liar*), and is now equally common. The word is historically a monosyllable, but poets have often

made two syllables of it, a pronunciation supported by the spelling *briar*.]

Brig (brig). Also 8 brigg. [Abbreviation of Brigantine. Cf. *cab, mob, zoo.*, etc.] A vessel (a.) originally identical with the *brigantine* (of which word *brig* was a colloquial abbreviation); but, while the full name has remained with the unchanged brigantine, the shortened name has accompanied the modifications which have subsequently been made in rig, so that a *brig* is now

(b.) A vessel with two masts square-rigged like a ship's fore- and main-masts, but carrying also on her main-mast a lower fore-and-aft sail with a gaff and boom.

A brig differs from a *snow* in having no try-sail mast, and in lowering her gaff to furl the sail. Merchant snows are often called 'brigs'. This vessel was probably developed from the brigantine by the men-of-war brigs, so as to obtain greater sail-power.

(12th c.) *brynstán* (MS. Vesp. D. XIV, f. 163), app. f. *bern-, brinn-,* stems of Burn *v.* + Stone *sb.*; cf. ON. *brenni-steinn* **sulphur**; also, for the form, OE. *berne-lác* burnt-offering. An identical formation in other Teut. langs. (MDu. and MLG. *bernsteen,* Du. *barnsteen,* Ger. *bernstein*) is used with the sense 'amber'. The transposition in *bern-, bren-* was inherited from the vb.; the subsequent change to *brim-* may have been due to association with the adj. *brim,* Breme 'fierce': cf. quot. *c* 1400 in 1 *a.*

The uncertainty of form in ME. may be estimated by the fact that the printed ed. of Wyclif (Forshall and Madden) has in the two texts the following varieties:—*Gen.* xix. 24 brenstoon, brynston; *Deut.* xxix. 23 brimstoon, brymston; *Job* xviii. 15 brumston, brymston; *Ps.* x. 7 brunston, brymston; *Isa.* xxx. 33 brunston, brymstoon.]

1. Formerly the common vernacular name for Sulphur. Now used chiefly when referring to its inflammable character, and to the biblical use in *Gen.* xix. 24 and *Rev.* xix. 20; or in speaking of old-fashioned prescriptions, as 'brimstone and treacle'.

Bot.* II. 1070/1 Brinjals..are of the size and form of a goose's egg, and usually of a rich purple colour.

[Few names even of plants examplify so fully the changes to which a foreign and unintelligible word is liable under the influence of popular etymology and form-association. Cognate with the Sp. *alberengena* is the Fr. *aubergine*, dial. *albergine, albergaine, albergame*, also without the *al-, belingtle*, and, with *m* for *b, merangène, melongène*, botanical Lat. *melongena*, It. *melanzana, mela insana* (= mad apple). All these go back to the Arabic *bâdinjân*, and ultimately to Skr. *vâtin-gaṇa*, whence also Hindustâni *baingan, began*. The Malay *berinjâla*, prob. from Pg., illustrates the Anglo-Indian form (see Devic, and Yule). In the West Indies *brinjalle* has been further corrupted to *brown-jolly*. The Sanskrit name is said to mean 'the class (that removes) the wind-disorder (windy humour)', a meaning supposed to connect it with *vârttâku*, another name of the same plant, which is said to have a *mârutâ-nâśin* or 'wind-removing' effect. (J. T. Platts.)]

Brisk (brisk), *a.* and *sb.* Also 7 **briske, brisque.** [First found in end of 16th c.; evidently familiar to Shakspere and his contemporaries. Derivation uncertain: Welsh *brysg* (used of briskness of foot) occurs in a poem of the 14th c. This appears to answer in form to OIr. *brisc*, Ir. *briosg*, Gael. *brisg*, Breton *bresk*, 'brittle', 'crumbly'; but it is not easy to connect the senses.

It is however possible that *brisk* is identical with F. *brusque* (which appears as *brusk* in Sc. *c* 1560, and as *brusko* as early as 1600); at least Cotgr. gives *brisk* as a translation of *brusque*, and the words appear to have influenced each other in early use. See BRUSQUE.]

The proper name of the whole island containing England, Wales, and Scotland, with their dependencies; more fully called Great Britain; now also used for the British state or empire as a whole.

After the OE. period, *Britain* was used only as a historical term, until about the time of Henry VIII and Edward VI, when it was [illegible] ...tics in connexion with and Scotland; in 1604 James I was proclaimed 'King of Great Britain'; and this name was adopted for the United Kingdom, at the Union in 1707. After that event, *South Britain* and *North Britain* are frequent in Acts of Parl. for England and Scotland respectively: the latter is still in occasional (chiefly postal) use. (So *West Britain,* humorously or polemically for 'Ireland'.) *Greater Britain* is a modern rhetorical phrase for 'Great Britain and the colonies', 'the British Empire', brought into vogue in 1868.

Britisher (brɪ·tɪʃəɹ). [f. British + -er: cf. *foreigner*.

(Apparently of U. S. origin, and chiefly used by, or attributed to, Americans. Mr. R. Grant White has strongly disclaimed its use in U. S., but Mr. Fitzedward Hall has known it as of American currency all his life. Prof. Freeman, in his *Impressions of U. S.*, thinks it arose during the War of Independence, when the opposing forces were known as 'American' and 'British' (not 'English'), and 'Britisher' was the natural substantive from the latter. Mr. F. treats the word more dispassionately than those who denounce it as an 'odious vulgarism'. See his work.)]

A British subject; a native or inhabitant of Great Britain (as distinguished from an American citizen).

1829 Marryat *F. Mildmay* xx, [American mate *loquitur*] 'Are we going to be bullied by these .. Britishers?' 1866 *Spectator* 14 Nov. 1325 Mr. Reverdy Johnson .. was so complimentary to England .. and to Britisher institutions. 1879 T. E. C. Leslie in *Academy* 23 Even tawdry rhetoric is venial compared with the sin of using such an odious vulgarism as the word Britisher for Englishman or Briton. 1883 Freeman *Impressions U. S.* iv. 89, I always told my American friends that I had rather be called a Britisher than an Englishman, if by calling me an Englishman they meant to imply that they were not Englishmen themselves. *Ibid.* vi. 43 The American is really more called on to know about British matters than the Britisher is called on to know about American matters. 1884 Stevenson *New Arab. The ME. *Bryton, Bruton* show various etymological influences; the modern *Briton* is assimilated to the erroneous L. form *Brito*, pl. *Britōn-es*, found in MSS. (The earlier name by which the Romans spoke of this people was *Britanni*, or *Brittāni, -anni*, which appears to have been a Goidelic name; but after the conquest of Britain, this was gradually superseded by *Brittones* the name given to themselves by the Brythonic people of the south of the island. Only the latter survived in living use: Bæda's regular form is *Bretto, -ones*; and F. *Breton* represents a L. form with *-tt-*; *Brittōnem, Britōnem*, would have given *Brion, Broon*. The OE. name was *Brettas, Bryttas*: see Brit.)]

Broad Church. [See Broad *a.* 11.]

A designation popularly applied to members of the Church of England who take its formularies and doctrines in a broad or liberal sense, and hold that the church should be comprehensive and tolerant, so as to admit of more or less variety of opinion in matters of dogma and ritual. Also sometimes applied to the corresponding school of opinion in other churches. (Often *attrib.*)

The phrase came into vogue about 40 years ago, and is framed on the analogy of the far older 'High Church' and 'Low Church'; but it is not used in the same manner, the Broad Churchmen, so called, not having, like the High and the Low Church, a party organization, and seldom acting together as a party. According to the Master of Balliol (Prof. Jowett), the term was first proposed in conversation, in his hearing, by the late A. H. Clough, and became colloquially familiar in Oxford circles, a few years before 1850. In 1850 Dean Stanley claimed in an article on the Gorham Controversy in the *Edinburgh Review*, that the Church of England as a whole is of necessity neither 'High' nor 'Low', but *broad*, in which there was evidently a reference to the term as one superior to party. But in 1853 the Rev. W. J. Conybeare, in an article in the same Review on 'Church Parties', used 'High', 'Low', and 'Broad', as recognized party designations. Already in the 17th c. Drydan had referred (*Hind & P.* III. 160) to the more tolerant divines of the church as 'your sons of latitude', (I. 287) 'your sons of breadth', (I. 289) 'your broadway sons'.

[1850 Stanley in *Edinb. Rev.* July 266 There is no need .. for minute comparison of the particular formularies of the Church to prove .. that it is, by the very conditions of its being, not High or Low, but Broad.] 1853 W. J. Conybeare in *Edin. Rev.* XCVIII. 330 Side by side with these various shades of High and Low Church, another party of a different character has always existed in the Church of England. It is called by different names; Moderate, Catholic, or Broad Church, by its friends; Latitudinarian or Indifferent by its enemies. Its distinctive character is the desire of comprehension. Its watchwords are Charity and Toleration. *Ibid.* 273 The three great parties which divide the Church of England .. commonly called the Low Church, the High Church, and the Broad Church parties. 1860 *Quart. Rev.* Oct. 497 The authoress [Geo. Eliot] is neither High-Church nor Low-Church, but a tolerant member of what is styled the Broad-Church party. 1884 *Edinb. Rev.* July 198.

Hence **Broad-Churchism, Broad-Churchman.**

1870 F. D. Maurice *Letter* in *Life* (1884) I. xii. 284 They [the Liberals] are called Broad Churchmen now, and delight to be called so. But their breadth seems to me to be narrowness. 1874 Gladstone *Ritualism in Cont. Rev.* Oct. 673 Some of those clergy who are called Broadchurchmen.

Brogue (brōg), *sb.*2 Also 6 brog, 7 brouge, 7–8 broge. [a. Irish and Gael. *brōg* 'shoe, brogue, sandal' (O'Reilly):—OIr. *brōce* shoe, app.:—OCelt. *brācca*: see Breech.

(The phonetic series *brācca*, *brōce*, *brōg*, is normal. But the sense-history is difficult: the word has in Ir. and Gael., and had even in OIr., only sense 1. Sense 2 looks as if Englishmen had confounded the Ir. *brōg* with the *mogan*, a kind of legging, covering the whole leg as well as the upper surface of the foot. Yet the etymological identity of *brōce* with Gaulish *brācca*, would point to a covering for the legs ('barbara tegmina crurum') originally. The sense of the first quot. is doubtful.)

1. A rude kind of shoe, generally made of untanned hide, worn by the inhabitants of the wilder parts of Ireland and the Scotch Highlands.

Broiden, *ppls. a. Obs.* Also 3 ibroiden, ibroyde, 5 broydyn. [A pa. pple. of Braid *v.* (cf. Abraid, which had also *abroiden*), and thus a doublet of Browden, which was the normal form, since OE. *og* became *ow*, *ou* in ME. But the combination was very rare before a consonant: so that evidence is wanting to show whether *oid* might become *oid* as well as *owd*, or whether in the case of *broiden* we have a kind of analogical variant of *broden*, somewhat on the model of *breden*, *breiden* of the infinitive. The question is the more important that the *oi* in *broiden* is apparently the source of that in Broid, Broider, and their derivatives, in all of which it is unexpected.

(*Litter* has Prov. *broydar*, for *brosdar* = F. *broder*, but although F. *broder*, and Eng. *broden*, were certainly confused at a later date, we cannot see how *broiden*, *abroiden* could be in any way affected by the Prov. word.)

[In 15th c. *broudre*, *brouder*, taken as the equivalent of F. *brode-r*, *brouder*; 'to stitch, embroider' (of which the regular Eng. repr. was *broude*, Browd). It is not clear whether the terminal *-er* represents the F. infinitive (as in *render*, *tender*, etc.), or had some other origin. The typical forms during the 16th c. were *browder* and *broder*; *broider* (exc. as implied in Broiderer. q. v.) is found only later; its *oi* is evidently due to the association with Braid 'to braid', so common in the 16th c.]

Broker (brōu·kəɹ). Forms: 4–5 brocor, brokour, brocour(e, 6 brooker, brokar, 7 broaker, 5– broker. See also BROGGER. [ME. *brocer, -our, brokour*, a. AngloF. *brocour* (also *broggour*) = ONF. *brokeor* (:—L. type **broccātōrem*), nom. *brokiers* (:—L. **broccātor*) of which Godefroy has one example explained by him as 'celui qui vend du vin au broc', as to the precise sense of which see below. The Central Fr. equivalent was *brocheor, brochière*; and the word is the agent noun of the OFr. vb. *brochier*, ONF. *brokier* (:—L. **broccāre*) in the sense 'to broach' or 'tap' a cask. *Brocheor, brokeor* stand in precisely the same relation to the sb. *broche, broc*, and the vb. *brochier, brokier*, as *tapster* or rather the earlier *tapper* stand to the sb. *tap*, and vb. to *tap* in Teutonic: the *brocheor, brokeor, brokour*, or *broker*, was lit. a tapster, who retailed wine 'from the tap', and hence, by extension, any retail-dealer, one who bought to sell over again, a second-hand dealer, or who bought for another, hence a jobber, middleman, agent, etc. Cf. sense of L. *caupo*.

The Romanic vb. *broccare* was evidently f. *brocco, brocca* in the sense of 'spike, piercing instrument' (:—L. *broccus, brocca* adj.: see BROACH). But these sbs. appear to have afterwards had their sense modified from the verb, so that in the OF. *vendre à broke*, or *à broche*, in mod.F. *vendre à broc*, the sense passed from 'broach', to 'broaching, tapping', and at length to 'the quantity of wine drawn at a broaching or tapping', and hence 'the jug or vessel which held this', as in mod.F. *broc* (from 5 to 10 litres). Anglo-French had also a deriv. form *abrocour*, and there were Anglo-Latin words *abrocator, abrocamentum*; also *brocarius* 'proxeneta, interpres et conciliarius contractuum', and *abrocarius*. *Brocarius* appears to have been formed on the sb. (*broc(c)a, broc(c)us*); *abrocarius* must have been formed on the apparent analogy of *brocator, abrocator*.]

Bronze (brǫnz), *sb.* [a. F. *bronze* (16th c. in Littré), ad. It. *bronzo* 'brass or bell-metal' (Florio); whence also Sp. *bronze*, *bronce*. The origin of the It. is uncertain: Muratori, cited by Diez, thinks it formed from *bruno* 'brown', through an intermediate **brunizzo*, **bruniccio*:—late L. *brunitius* 'brownish, brown-coloured'. But this is very doubtful phonetically. Diez also mentions Venetian *bronza* glowing coals, 'perh. the Ger. *brunst* fire, burning, heat', as possibly connected.]

1. A brown-coloured alloy of copper and tin, sometimes also containing a little zinc and lead. Formerly included under the term BRASS, q.v.; the name *bronze* was introduced for the material of ancient works of art, or perhaps rather for the works of art themselves: see sense 2.

The ratio of the constituents in ordinary bronze is about 8 or 9 parts of copper to 1 of tin; in bell-metal the proportion of tin is much greater. See BELL-METAL. (A bronze currency was introduced in Great Britain instead of copper in 1860; but from traditional habit, a bronze coin is still called familiarly 'a copper'.)

Broose. *Sc.* Also **broose, bruise.** [Sc. pron. brōz, brūz: of unknown origin. The suggestion of Jamieson that the word is the same as *brose* or *brewis* is absurdly impossible; (though phonetically it might be *broos*, pl. of Broo): mod. Sc. ō, ū, derives from OE. *ó* or Fr. *u*.] A race on horseback, or on foot, by the young men present at country weddings in the north, the course being from the place where the marriage ceremony is performed (in Scotland the bride's former home) to the bridegroom's house. Hence *to ride, run, win the broose.* (The prize is usually a coloured silk handkerchief.)

It is understood to be a survival from primitive marriage customs: probably the whole wedding cortège formerly conveyed the bride at full gallop to the bridegroom's house; but now the race is kept up by the young men only, the rest of the procession following at leisure. Cf. Bridelos, and the Teutonic synonyms there mentioned.

Brother (brɒ·ðəɹ), *sb.* Pl. brothers, brethren (bre·ðrėn). Forms: 1 bróðor, -ur, -er, 2–5 broþer, 3– brother (*passim* -er, -ir, -ere, -re, -yr, broither), 4–6 broder, -ir, -yr, 6 bruder; *mod.Sc.* brither. *Plural*: see below. [A Common Teut., and Common Aryan word: OE. *bróðor* = OFris. *bróther*, *bróder*, OS. *bróthar* (MDu. and Du. *broeder*, MLG. and mod.LG. *broder*), OHG. *bruodar* (MHG. *bruoder*, Ger. *bruder*), ON. *bróðir* (Sw., Da. *broder*), Goth. *bróþar*:—OTeut. **bróþar*:—OAryan **bhrā·ter*, *-tor*, *-ir*, whence also Skr. *bhrātṛ*, Gr. φρᾱτηρ, L. *frāter*, OSlav. *brātŭ*, OCelt. **brāter* (Ir. and Gael. *brathair*, Welsh *brawd* (from **brawdr*), Breton *breur* (formerly *breuzr*).

As in some other words in OE. long *ā*, the mod. form has undergone more than the usual vowel change, which would have left it (brē·ðəɹ). In ME., esp. in north. dial. and Sc., the *th* was often written *d*, perhaps after *fader*, *moder*. The OE. dat. sing. was *bróðer*; the gen. was the same as the nom. and remained so in Scotch down to 1600, as in the connexion *broder son* (nephew), *broder bairn*, *broder wyfe*, *broder dochter*, which have often been misunderstood by modern readers. The plural has had a great variety of forms: viz. in OE. *bróðor*, *-ur*, *-or* (like the sing.), and *bróðru*, *-ro*, *-ra*, also once *broþpre* (in Anglian, in Rushworth Gloss.); and with collective sense, *gebróðor*, and *gebróðru*, *-ro*, *-ra*. In early ME. the *Lambeth Homilies* have *broþre*, *broþre*, and rarely *broþren*; the *Trin. Coll. Hom.* *broþren* and *broþrun*; *Ormin* and *Gen. & Ex.* have always *broþre*, *broþere*; of *Layamon* the first text has a variety of forms, most frequently *broþ e)ren*, frequently *broþe ren*, rarely *broþ(e)re*, (never *broþre* or *broþer*), once *broþerne*, once *broþeres*; the second text has always *broþerre*, *broþere*. The Jesus MS. poems in *O.E. Misc.* have usually *broþren*, which is the regular form in *Ayenbite*; *broth(e)ren* occurs in many writers down nearly to 1600. In northern Eng., from the earliest distinctive specimens, the regular plural form was *broþer*, *brother*; often used also by non-northern writers. The standard English plural, down to 1600, was *broþ(e)ren*, *brethren*. *Brothers*, after its early appearance in Layamon, is not quoted again till the end of the 16th c., when it is used by Shakspere indiscriminately with *brethren*. In the 17th c. *brothers* became the ordinary form in the literal sense; *brethren* being retained in reference to spiritual, ecclesiastical, or professional relationship.

The original Teut. pl. nom. corresponding to Aryan **bhrā·tres*, would be **bróþpris*, whence regularly ON. *bræðr*. The corresponding OE. **bréðer*, **bréðer* is unexpectedly wanting: but the Mercian *bróþpre*, and its ME. descendant *brethre* (see β) may possibly be a remnant of it. The northern *brether* (see γ) may actually have come down from **bréðer*, though it may also merely be *brethre* with the final *e* dropped. The OE. *-u*, *-o* (*-a*) forms are difficult to explain: it has been suggested that they might be originally duals (like *sculdru* from *sculdor* masc.). They were regularly represented by ME. *brothre* (see *a*). *Brothren*, *brethren* exemplify the usual passage of *sbs.* having vowel plurals in southern early ME. into the *-en* type. The early occurrence of the modern *brothers*, as well as its subsequent non-appearance till the end of the 16th c., is notable and requires further investigation. In the genitive pl. *bréðere* occurs in *Gen. & Ex.*; *broþern-e* in *St. Brandan*; *broþer*, *broþers* was northern; *brothren's* standard Eng., now, in ordinary use, *brothers'*.]

B. Signification: I. as simple *sb.*

1. The word applied to a male being to express his relationship to others (male or female) as the child of the same parent or parents.

In the singular usually defined by a possessive word expressed or implied as 'my brother', 'the king's youngest brother', 'the brother of your friend', '(our) Brother Jonathan', 'come, (my) brother!'; in the plural, this may be absent, if the relationship is between the individuals themselves, as in 'they are brothers (*i. e.* to each other)'.

a. *properly*. The son of the same parents. But often extended to include one who has either parent in common with another (more strictly called *half-brother*, or *brother of the half blood*); also to a Brother-in-law. See *brother-uterine* (in 9 d), also Brother-german, Good-brother. (Also applicable to animals.)

A forlorn and shipwrecked brother, Seeing, shall take heart again. 1860 Mackay *Brotherhood of Nations* vi, Are ye not brothers?..Is [God] not Father of all climes and lands? 1871 Morley *Voltaire* (1886) 204 An ungrateful infection, weakening and corrupting the future of his brothers.

b. *A man and a brother*: a phrase taken from the motto on the seal of the British and Foreign Anti-Slavery Society, 'Am I not a man and a brother?' approved by a Committee of the Society on 16 Oct. 1787.

(The design, a kneeling slave in chains, uttering the words, was shortly after produced as a cameo, black on white, by Wedgwood, and became extremely popular as a personal ornament. The seal is in regular use by the philanthropic society, which still carries on the war against slavery and the slave trade.)

1792 E. Darwin *Bot. Gard.* 101 [an engraving of the device and motto]. 1808 Clarkson *Hist. Abolition* I. 450; II. 291. 1829 Montgomery *Songs Abolition Slavery* I. ii, The Negro wakes to liberty..Read the great charter on his brow, I am a man, a brother now.

Hence (contemptuously), *man-and-brotherism*, the anti-slavery movement.

1864 *Pall Mall G.* 27 Mar. 3/1 Is this the principle of abolition? Are these the sentiments of man and brotherism?

3. A fellow-member of a Christian society, or of the Christian Church as a whole; a fellow-christian; a co-religionist generally. (Pl. *brethren*.)

b. *The Brethren*: in N.T. the members of the early Christian churches; hence, sometimes adopted by (or applied ironically to) members of various Christian associations, claiming to adhere to New Testament principles; e. g. the Puritan party in the Church of England under Queen Elizabeth. Also in the adopted title or common appellation of some modern sects who reject 'orders' in the church, e. g. 'Brethren', 'Brethren in Christ', 'Christian Brethren', 'Plymouth Brethren', etc. (See the Registrar-General's *Reports*.)

1382 Wyclif *Acts* xviii. 18 Paul..seide fare wel to britheren. 1534 Tindale *ibid.* Paul..toke his leave of the brethren. 1655 Fuller *Ch. II. *attrib.* and in *Comb.*

8. *attrib.* Placed before other substantives, in the same way as *fellow-*. *Brother-man*: a man recognized as a brother, a 'man and brother'.

Often united by a hyphen, esp. in the singular, so as to make clearer the attributive relation of *brother* to the second word (contrast *brother-officer* with *brother John*); but in the plural this is sufficiently shown by the inflexion of the second word and non-inflexion of *brother*. Formerly *brother* was also made plural.

Brothered, *sb.* : see Brotherred.

Brother-german (brʌ·ðəɹˌdʒɜ·mən.) Pl. **brothers-german** (formerly **brethren-**). [f. Brother *sb.* + German.] A brother through both parents; a 'whole' brother.

Early writers also used it as = 'brother on the mother's side, brother-uterine'; it has been proposed in modern times to restrict it to 'brother on the father's side'.

1340 *Ayenb.* 146 Broþer germayn of uader and of moder. *c* 1450 *Merlin* viii. 122 Thei be men of high lynage, and be bretheren germain. 1480 Caxton *Chron. Macfarlane *Consanguinity* 8, I use the term brother-german, to denote brother on the father's side.

Brotherhood (brʌ·ðəɹhud), also †**brotherhead**. Forms: *α.* 4 broþɔrhede, broiþer-, broder-, brodurhede, brethered, 4–5 brotherhede, 5 breþerheed, 4–6 brotherheed, 5 brotherheed, britherhed(e, brodirhede, broþerhed, 5–6 bretherhed, brodered, 6 (breethreed), brotherhead, brodirhed, brotherhed, -head(e, -hedde. *β.* 5 broder-, broþerhode, breþerode, britherhod, 5–6 brotherode, -hode, 6 brotherhoode, 6– brotherhood. [Not in OE.: the earlier ME. form *broþerhede* was, in form, a derivative of Brother and *-hed, -hede*; but arose probably from the accession of the earlier Brotherred(e (which goes back to OE.) to the *-hede* class, through the intermediate *brothered(e*, the ending of which might be either *-rede* or *-hede*. This is made still more likely by the fact that the variant *brotherhode* (whence the modern *brotherhood*) is not found before the 15th c.; whereas *childhood, maidenhood, wifehood*, and other genuine derivatives in *-hood* go back to an OE. *-hād* and early ME. *-had*, later *-hēd(e*, with *-hed, -hede* as an occasional ME. variant. See -head, -hood, -red. The variant *bretharhede* was frequent from the 14th c. till about the Reformation, evidently by association with the *brether* or *brethren* of a guild or order: 'the bretheren and sustren of the bretherhede'.]

Brow (brau), *sb.*1 Forms: 1 brú (*pl.* brúa), 2 bruw(e, 3 brouwe, brou, bruu, 3–4 brue, 4 brwe, brewe, 4–7 browe. 5 brou3, broue, 5– brow. [OE. *brū* fem., inflected on the type of an OTeut. *brūā-* str. fem., but prob. only an OE. accession to the *ō*- declension of a WGer. or primitive OE. *brū* of the type of *cū*, *sū*:—OTeut. **brū-s* (= Skr. *bhrū-s* eye-brow, Gr. ὀφρύ-ς). The original sense appears to have been 'eye-brow', but it must have been extended at an early date from the hair over the eyes to that on the eye-lids, the 'eye-lashes', for this was the normal sense in OE., the eye-brows being distinguished as *ofer-brūa* i. e. over-eye-lashes, or otherwise contextually. From the eye-lashes, the name appears to have been transferred step by step to the eye-lids, the eye-brows, the prominences of the forehead, and finally to the forehead as a whole. See also BREB *sb.*1, and cf. BEETLE-BROWED.

ON. *brún* fem. 'bridge' was perhaps the same word, with a transferred sense; but the ON. word actually used for 'eye-brow' was *brún*, pl. *brýnn*, conjectured to be a secondary form from *brū-* founded on the gen. pl. *brú-na*. (Cf. mod.G. *braune* brow, founded on the pl. *braun, brauen*, MHG. *brāwen*, pl. of *brāwe*.) In the other Teutonic langs. **brū-* is lost, and its place supplied by **brǣwā-*; thus OHG. *brāwa* eye-lashes, *obarun brāwa, ubar-brāwa*, eye-brows, mod.G. *augen-braue, -braune* (see above) eye-brow, *wimper*, MHG. *wintbrāwe* eye-lash, Du. *wenkbraauw* eye-brow, all of which belong to OTeut. **brǣwā-*, WGer. *brāw*, OE. *brǣw*; see BARE. (It appears then that the Eng. *brow* and Ger. *braue*, Du. *braauw* are not even cognate.)

Brush (brʊʃ), *sb.*[2] Forms: 4–6 brussahe, 5 brusch(e, 7 brish, 6- brush. [ME. *brusshe*, a. OF. *brosse, broisse*, identified by most French etymologists with *brosse* brushwood (see BRUSH *sb.*[1]), the sense being supposed to be derived through that of 'bunch of broom or other shrub used to sweep away dust'; cf. BROOM. But the history of the French words has not been satisfactorily made out: cf. MHG. *bürste* fem. 'brush', from *borste* bristle, and see Diez, Littré, Scheler, Brachet.]

1. A utensil consisting of a piece of wood or other suitable material, set with small tufts or bunches of bristles, hair, or the like, for sweeping or scrubbing dust and dirt from a surface; and generally any utensil for brushing or sweeping.

Brushes are of many shapes and of various materials according to use; instead of bristles there may be slender wires, vegetable fibres, feathers, etc. They are named according to their use, as *clothes-brush, hat-brush, shoe-brush, blacking-brush, hair-brush, nail-brush, tooth-brush*, etc. A *hard* brush has stiff bristles; a *soft* brush fine and flexible bristles. The *chimney-sweep's brush* and *dust brush* pass into a *besom*.

†Brute, *sb.*[2] *Obs.* Also 6 bruit. [In sense 1, a variant of *Brett* or *Britt*, influenced by the *Brutus* myth; in 2, app. = *Brut, Brutus*, itself.

From the Old Celtic (and Latin) *Britto*, BRITON, there was subsequently formed the proper name of an eponymous hero, the reputed first king and founder of Britain. His name appears in Nennius also as *Brutto*, in the Irish version as *Britus* and *Brutus*. In the latter form he was linked with classical antiquity and the tale of Troy, being made a great-grandson of Æneas. *Brutus* accordingly became the prevailing form in Latin writers; and was adopted in Welsh and OF. as *Brut*, Of this the sense was transferred through that of 'chronicle or history of Brut' to that of 'chronicle of Britain' or 'Welsh chronicle' generally;

see Brut. But its use as a proper name was not forgotten, and in the 16th c. it appears to have given rise to sense 2.]

Buck (bŏk), *sb.*¹ Forms: (sense 'he-goat') 1 bucca, 2-3 buo, 3-4 bucke, 4-6 bukke; (senses 'male deer', etc.) 1, 5 buo, 3-5 bok, 4-7 bukke, bucke, 5 buk, 4- buck. [Orig. two words, OE. *buc* and *bucca*, which became indistinguishable in form after 11th c. So far as the evidence goes, OE. *buc* was used for the male deer, and *bucca* for the he-goat, but the instances are so few that it is far from certain that the words were thus distinguished in meaning. OE. *buc* = MDu. *boc*, Du. *bok*, OHG. *bocch* (MHG. *boc*, mod.G. *bock*), ON. *bukkr* (Sw. *bock*, Da. *buk*), all meaning primarily 'he-goat', though in each of the mod. langs. applied to male animals of the deer kind (in Da. also to the ram):—OTeut. **bukko-z.* This was adopted (only in the sense 'he-goat') in F. *bouc*, Pr., Cat. *boc*, OSp. *buco* (Diez); also, in same sense, as Welsh *bwch*, Ir., Gael. *boc*. The extended form represented by OE. *bucca* (:—OTeut. **bukkon-*) appears to exist in ON. *bokki* 'my good fellow, old buck' (Vigf.), but is otherwise peculiar to English. (With OTeut. **bukko-* Fick compares Zend *bûza* he-goat, also Skr. *bukka* he-goat; but the Teutonic does not phonetically correspond to these. Franck thinks it doubtful whether the word is native Teutonic, or rather an early adoption from some other language.)]

Bu·cket-shop. *U.S.* [? f. Bucket *sb.*[1] + Shop.]

(The *Leeds Mercury* of Dec. '86 says—'The market authority in Chicago, called the Board of Trade, would not allow a deal in 'options' of less than 5,000 bushels of grain. In order to catch men of small means, what was called the 'Open Board of Trade'..commenced business in an alley under the regular Board of Trade Rooms. There was an elevator to carry the members of the board to their rooms, and occasionally a member, if trade was slack, would call out, 'I'll send down and get a bucketful pretty soon,' referring to the speculators in the 'Open Board of Trade' below. Hence the term 'bucket shop' came to be applied to all grain gambling institutions.)

Buckorome, obs. form of Buckram.

‖ **Buckra** (bŭ'krä). Also buccra, buckara, buccara, buckree, -ro. [In negro patois of Surinam, *bakra*, master. According to J. L. Wilson, quoted in Mahn's Webster, in lang. of Calabar coast, 'demon, powerful and superior being'. H. Goldie *Dict. of Efik Lang.* (of Old Calabar) has *mbākara, mākara*, white man, European, f. *kara* to encompass, get round, master (a subject).]

Buckram (bŭ'krăm), *sb.* Forms: 3, 5 bukeram, (4 bougeren), 4, 6 bukram, 5 bokram, 5–6 bokeram, -ham, 6 bocram(e, -keram, bucram, -um, buckeram(e, -mme, 6–7 buckrom, -erom, -orome, 8 buchram, 6– buckram. [Found in most of the European langs. between 12th and 15th c.; cf. OF. *boquerant* (12th c.), *bouqueran, bouquerrant, bouguerant*, mod.F. *bougran*, Pr. *bocaran*, Cat. *bocaram* (Diez), Sp. *bucaran*, It. *bucherame* (in Boccaccio 14th c.), med.L. (in France) *boquerannus, bucaranus*, (in Italy) *buchiranus*; also MHG. *buggeram, buggeran, buckeram*. MDu. *bocraen, bocraal, bollecraen, boucraen*. In early continental and apparently in early Eng. use it denoted a costly and delicate fabric, sometimes of cotton and sometimes of linen; but it afterwards acquired the sense of coarse gummed linen used for linings, thus becoming synonymous with Sp. *bocací*, F. *boucassin*, Bocasin; and this meaning it retains in modern Eng., Fr., and It. (The MHG. lexicographers state that in that lang. the word meant 'a fabric of goat's hair', but this explanation may perhaps be a conjecture founded on a supposed derivation from Ger. *bock* Buck *sb.*[1]) As the Eng. forms generally have *m*, while all the Fr. forms have *n*, it is possible that the word may have been adopted into Eng. not from Fr. but from Italian. For the history of the word in Europe, and its probable changes of meaning, see Col. Yule's *Marco Polo* I. 46–48 and 59.
Of the ultimate etymology nothing is really known. Some refer to It. *bucherare* 'to pierce full of holes', supposing that the name was first given to a kind of muslin or net (cf. quot. 1548 in 1). Reiske (in *Constantin. Porphyrog* ed. Niebuhr II. 530) proposes Arab. أبو قرام *abū qirām* pannus cum intextis figuris', but he does not say where he found this compound; the simple *qirām* is of doubtful meaning, the native lexicographers quoted in the Qāmūs giving the various renderings 'red veil', 'striped and figured woollen cloth', 'thin veil' (Freytag, s.v.). Others suggest derivation from *Bokhara*, or from *Bulgaria*, but this does not agree with the early Fr. forms.]

4. A statement of the probable revenue and expenditure for the ensuing year, with financial proposals founded thereon, annually submitted by the Chancellor of the Exchequer, on behalf of the Ministry, for the approval of the House of Commons. Sometimes put for the condition of the national finances as disclosed in the ministerial statement; also for the financial measures proposed. Hence applied to an analogous statement made by the finance minister of any foreign country; also to a prospective estimate of receipts and expenditure, or a financial scheme, of a public body, or (humorously) of an individual.

[The Chancellor of the Exchequer, in presenting his annual statement, was formerly said *to open the budget*. In a pamphlet entitled *The Budget Opened*, Sir R. Walpole was compared, apropos of his forthcoming Excise Bill, to a mountebank opening his wallet of quack medicines and conjuring tricks.]

Bug (bŭg), *sb.*¹ *Obs.* or *dial.* Forms: 4–7 bugge, 6–8 bugg, 6– bug. [ME. *bugge*, possibly from Welsh *bwg* (= *bŭg*) 'a ghost', quoted in Lhwyd's *Archæologia Brit.* (1707) 214, from the MS. Welsh Vocabulary of Henry Salesbury (born 1561). Owen Pugh has *bwg* 'hobgoblin, scarecrow'; but the word is apparently now known chiefly in its derivatives. When *bug* became current as the name of an insect (see Bug *sb.*²), this sense fell into disuse, and now survives only in the compound BUGBEAR. Cf. BOGY, BUGABOO.

Although Salesbury's evidence takes the Welsh word back only to the latter half of the 16th c., before which there was plenty of time for its adoption from the Eng. *bugge*, *bug*, its Welsh nativity is strongly supported by a numerous family of derivatives, e.g. *bwgan* (= *bw'gan*) bugbear, scarer, *bwgwth* to terrify, threaten, *bwgwl* (= *bw'gwl*) terror, terrifying, threatening, whence *bygylu* (= *bŭgə'lĭă*) to terrify, threaten, *bygwydd* (= *bə'gwĭð*) hobgoblin, phantom. The S. Wales *bwci* (*bw'ki*) can however scarcely be a derivative, but looks like an adoption of ME. *bugge*, or modern *bogy*. With these Welsh words cf. Manx *boag*, *boagdne* 'bugbear, bogle, sprite' (whence *boaganagh* frightful, *boaganagh* scarecrow), the Irish *bocán* hobgoblin, Gael. *bochdan* (? for *bocan*) hobgoblin (though these cannot be actually cognate with Welsh *bwgan*). Owen Pugh has also *bygel nos* 'phantom', which seems however to be an error for *buguil nos*, in Breton *buguel-nos* 'shepherd or lad of the night'.]

1. An object of terror, usually an imaginary one; a bugbear, hobgoblin, bogy; a scarecrow. *To swear by no bugs*: to take a genuine oath, not a mere pretence of one.

1388 WYCLIF *Baruch* vi. 69 As a bugge, *either a man of raggis* [1611 scarcrow] in a place where gourdis wexen. *c* 1440 *Promp. b. ? A person of assumed importance. Possibly this may survive in the U. S. slang 'a big bug' for an aristocrat, 'swell', though the latter is regarded by those who use it as referring to BUG *sb.*³

Bug (bŭg), *sb.*² [Etymology unknown. Usually supposed to be a transferred sense of prec.; but this is merely a conjecture, without actual evidence, and it has not been shown how a word meaning 'object of terror, bogle', became a generic name for beetles, grubs, etc. Sense 1 shows either connexion or confusion with the earlier *budde*; in quot. 1783 *shorn bug* appears for ME. *scearn-budde* (*-bude*):—OE. *scearn-budda* dung-beetle, and in Kent the 'stag-beetle' is still called *shawn-bug*. Cf. Cheshire 'buggin, a louse' (Holland).]

[ME. *bulden*(*ii*), *bylden*, *bilden* :—OE. **byldan* to build (recorded only in pa. pple. *gebyld*), f. *bold* a dwelling. Hence the two fundamental senses are 'to construct a dwelling' and 'to take up one's abode, dwell'. The normal modern spelling of the word would be *bild* (as it is actually pronounced); the origin of the spelling *bui-* (*buy-* in Caxton), and its retention to modern times, are difficult of explanation.

The OE. pple. *ȝebyld* might be from a compound *ȝebyldan*: but cf. the southern *bytlan* (*Gregory's Past. Care* 133, l. 9–10), later *bytlian* (see BOWL-Toller), f. **bupla* (whence *botl*, *bold*), which points to the antiquity of the vb. (Not to be confounded with OE. *byldan*, *ȝebyldan*, for *bisldan* to make bold: see BIELD.)]

I. To erect a building.

1. *trans. Orig.* To construct for a dwelling; to erect (a house), make (a nest). *Hence*, To erect, construct (any work of masonry), and by extension, To construct by fitting together of separate parts; chiefly with reference to structures of considerable size, as a ship or boat, a carriage, an organ, a steam-engine (not, e.g. a watch or a piano). Const. *of*, more rarely *from*, *out of*, *with* (the material), *on* (the foundation). In early mod. Eng. used with *up* without change of meaning; but *to build up* (in literal sense) now implies a contrast with pulling down, or with a previous state of decay, as 'to build up again'. *To build a fire*: to arrange or pile the fuel. *To build a railroad*, said in U.S., is unknown in England.

b. With certain advbs., *build* forms virtual compounds founded on this sense, but used trans. with the notion 'to affect in such or such ways by building'. *To build up*: to obstruct (a doorway,

window, etc.) by building. *To build in*: to immure, enclose by building. *To build round*: to surround with buildings.

The advbs. may either follow or precede the object.

1876 Browning *La Saisiaz* 6 Now built round by rock and boulder. *Mod.* When we first came here, the situation was very open, but we are now completely built in.

3. *transf.* To construct by a process or with a result analogous to that of the builder. Said, e. g., of the Creator, or of natural forces, as when a crystal, an organic body, or the world, is compared to an edifice. Often said in passive of the human body, as 'His frame was strongly built' (cf. BUILD *sb.*). *Const.* as in 1.

4. *fig.* With reference to immaterial objects: To construct, frame, raise, by gradual means (anything that is compared to an edifice, as a philosophical system, a literary work, a reputation, an empire). Often with *up*. In religious use, after N. T., *To build up* (the Church, an individual) = to EDIFY (also *absol.*). *To build up* (any one's health, strength, etc.): to establish it by gradual means.

Bulk (bŭlk), *sb.*[1] Forms: 5 bolk(e, 5–7 bulke, 6 bulcke, boulke, bowlke, (5–6, 9 *Sc.* bowk, see BOUK), 7 bulck, (boak), 6– bulk. [Of complicated etymology. The coincidence in meaning with ON. **bulki*, Icel. *bulki* 'heap, cargo of a ship' (Vigf.), Da. *bulk* lump, clod (cf. mod.Icel. *bulka-st* to be bulky), suggests that the word, though not recorded before 15th c., may (in the senses 'heap', 'cargo') be of Scandinavian origin. Within a few years of its first appearance, *bulk* occurs in the senses 'belly, trunk of the body', due app. to confusion with BOUK, which word it has entirely superseded in literary English. (Cf. however, the Flemish *bulck* 'thorax' in Kilian.) The sense of 'size' (branch III) seems to have been evolved chiefly from the notion of 'body', though it may be partly due to that of 'heap' or 'cargo'. The form *boak*, used by N. Fairfax 1674 indiscriminately with *bulk* in the sense of 'magnitude', is apparently :—ME. *bolk.*]

Bullfinch (bu·lfinʃ). Also **bulfinch.** [f. Bull *sb.*[1] + Finch. The reason for the name is uncertain: some have suggested that it was given on account of the thickness of the bird's neck.]

One of a genus of birds (*Pyrrhula*), allied to the Grosbeaks, having handsome plumage and a short, hard, rounded beak; well known for its aptness to be trained as a singing bird.

Forms: 5 **bullioun(e**, (*Sc.* **bulȝeon**), 6 **bolion**, **-lyon**, **bulloyn**, 6–7 **bullyon**, 7 **bulloin**, **-oigne**, (**bullen**, **bulline**), 5– **bullion.** [Of obscure etymology. First recorded as AF. *bullion* (see quot. 1330 in 1); the form appears to point to identity with F. *bouillon*, med. L. *bullio* 'boiling' (cf. prec.), but it does not appear that the word ever had, except in England, any of the senses defined below. If this etymology be correct, the sense of 'boiling' must have undergone a purely English development into those of 'melting', 'melted mass of metal'; the applications quoted under the preceding sb. (which are common to OF. and Eng.) probably furnished the suggestion for this extension of meaning. In MDu. *boetioen* seems to have had the sense of alloyed gold or silver (cf. 3, 4); see Verwijs & Verdam, who however identify the word with *billioen*, a. Fr. *billon*. The conjecture that *bullion* is in some way derived from L. *bulla* in the sense of seal or stamp appears to fail both with regard to form and meaning. The Fr. *billon* base metal (see BILLON) is unconnected in origin, but it seems to have influenced sense 4 of the present word; on the other hand, some obs. senses of Fr. *billon* seem to have been imitated from those of Eng. *bullion*.]

Bully (bu'lĭ), *sb.*¹ Also 6 **bullye**. [Etymology obscure: possibly ad. Du. *boel* 'lover (of either sex)', also 'brother' (Verwijs & Verdam); cf. MHG. *buole*, mod.Ger. *buhle* 'lover', earlier also 'friend, kinsman'. Bailey 1721 has *boolie* 'beloved' as an 'old word'. *Bully* can hardly be identical with Sc. BILLIE, brother, but the dial. sense 2 seems to have been influenced by that word. There does not appear to be sufficient reason for supposing that the senses under branch II. are of distinct etymology: the sense of 'hired ruffian' may be a development of that of 'fine fellow, gallant' (cf. *bravo*); or the notion of 'lover' may have given rise to that of 'protector of a prostitute', and this to the more general sense. In the popular etymological consciousness the word is perhaps now associated with BULL *sb.*; cf. BULLOCK *v.*]

I. †**1.** A term of endearment and familiarity orig. applied to either sex: sweet heart, darling. Later applied to men only, implying friendly admiration: good friend, fine fellow, 'gallant'. Often prefixed as a sort of title to the name or designation of the person addressed, as in Shaks., 'bully Bottom', 'bully doctor'. *Obs.* exc. *arch.*

Bult, -e, obs. pa. t. of BUILD *v.*

Bultell(e, var. of BOULTEL, *Obs.*, a sieve, sieve-cloth.

(Owing to a misunderstanding of the passage in *Act* 51 *Hen.* III. (quoted s. v. BOULTEL) the word *bultel* was explained in Blount *Law Dict.* 1670 as 'the refuse of the Meal after it is dressed by the Baker'. This erroneous definition was repeated with some differences of expression by Phillips and Bailey, and appears in many recent Dicts.)

Bulter, bultey (bʊ·ltə, bʊ·lti). [A word belonging to the Cornish fisheries, also called *bolter*, BOULTER; of unknown derivation.] See quots.

Bultow (bu·ltəu). [Mahn says 'f. BULL large, and TOW'; but the word looks like an alteration of the prec., under the influence of 'popular etymology'. (Du. *bulletouw*, 'a name applied to several ropes about a ship', has also been suggested.)] (See quots.)

1858 P. L. SIMMONDS *Comm. Dict.*, *Bultow*, a mode of fishing practised in the [Newfoundland] Bank fisheries by stringing a number of hooks on one line. 1883 *Standard* 13 Sept. 5/4 The 'bultow' is .. a set line, called in some places a 'trawl line'.

Bulwark (bu·lwŏrk), *sb.* Forms: 5 **bulwerke**, 5–6 **bul-, bullwork(e**, 6 **bolwark, (bulwarge)**, 6–7 **bulwarke**, (7 **burwarke**), 9 **bullwark**, 6– **bulwark.** [Cf. Du., MHG. *bolwerk*, mod.G. *bollwerk*, Da. *bulværk*, Sw. *bolverk*; the word is not recorded in ON., and the Da. and Sw. forms may be of German origin. Prof. Skeat, regarding the word as ultimately Scandinavian, derives it from the words represented in Eng. by BOLE and WORK, in which case the primitive sense would be 'a work constructed of tree-trunks'. Others

would connect the first element with the MHG. verb *boln* to throw, on the ground that the MHG. word seems in some cases to have meant a machine for throwing large stones. Both etymologies are found in early mod. German authors. The Teut. word was borrowed in French as *boulleuvre, bollewerc*, whence *boulevar*, mod. BOULEVARD.]

Bun (bʌn), *sb.*[2] Forms: 4–7 bunne, 5 bonn(e, 8–9 bunn, 5– bun. [Etymology doubtful. The mod. provincial Fr. *bugne* is said by Burguy and by Boiste (1840), to be used at Lyons for a sort of fritter; the word is not recorded in OF. with this sense, but *bugne, beugne* (= mod. *bigne*) occurs with the sense of 'swelling produced by a blow'; the dim. *bugnete* is found in OF. with the sense of 'fritter', and *bugnets* is given by Cotgr. (1611) as a synonym of *bignets* (now *beignets*), explained by him as 'little round loaves, or lumpes made of fine meale, oyle or butter, and reasons; bunnes, Lenten loaves'. (Cf. Sp. *buñuelo* bun, fritter.) It is conjectured that OF. *bugne*, originally 'swelling' may have had the unrecorded sense of 'puffed loaf' (= *bugnet*), and may have been adopted into English as *bun*. But the existence of this sense in OF, is at present hypothetical, and it is questionable whether such a derivation would account for the form of the Eng. word.]

1. A sort of cake: the use differs greatly in different localities, but the word generally denotes in England a sweet cake (usually round) not too large to be held in the hand while being eaten. In Scotland it usually means a very rich description of cake, the substance of which is almost entirely composed of fruit and spice; the richest kind of currant bread. In some places, as in the north of Ireland, it means a round loaf of ordinary bread. In the earliest examples the meaning is doubtful, the context merely indicating some kind of loaf or cake. (See CROSS-BUN.)

Buncombe, bunkum (bʌŋkəm). [f. *Buncombe*, name of a county in N. Carolina, U. S. The use of the word originated near the close of the debate on the 'Missouri Question' in the 16th congress, when the member from this district rose to speak, while the house was impatiently calling for the 'Question'. Several members gathered round him, begging him to desist; he persevered, however, for a while, declaring that the people of his district expected it, and that he was bound to *make a speech for Buncombe*. (See Bartlett, *Amer. Dict.*)]

1. *in U. S. use* (see above):

a. In phrases, such as, *to talk* or *speak for* or *to Buncombe, to pass* a measure *for buncombe* (i. e. to please or gull a constituency), *a bid for buncombe* (i. e. for the favourable notice of the electors), and the like. b. Political speaking or action not from conviction, but in order to gain the favour of electors, or make a show of patriotism, or zeal; political clap-trap.

There are several similar forms in Romanic: It. *borbogliare* to make a rumbling or grumbling noise, Pg. *borbulhar*, Sp. *borbollar* to bubble forth, also mod. Picard *borbouller* to murmur (Diez); all apparently imitative words, though Diez thinks the Sp. and Pg. possibly formed on L. *bulla* bubble. The Eng. word can hardly have any actual connexion with these, exc. as a parallel onomatopœia, expressing the sound made by the agitation, issuing forth, or flowing of a liquid mixed with vesicles of air or gas. Of this the later BUBBLE appears to have been either a simple variant or a conscious modification. In the later use of *burble* there is more of the notion of flowing than in *bubble*, as though *burble* combined the notions of *bubble* and *purl*; but the sb. *burble* was in 14-16th c. exactly = L. *bulla* 'bubble'.]

[A word of obscure origin, found in the earliest ME. in form *burde*, frequent in Layamon, but afterwards chiefly in northern, or north midl. writers, and in alliterative verse.

Burd has been variously identified with BIRD, and with BRIDE. Although its later spelling is identical with the mod. Sc. form of *bird*, and it has been sometimes treated as merely a fig. use of this word, the earlier forms of both show them to be quite distinct. The identification with *bride* has somewhat more plausibility; but even if we take as the basis the Da. *brud* instead of the OE. *bryd*, the phonetic difficulties are many and serious. The various ME. spellings seem to indicate that the vowel was *ū* = OE. *y*; some of them also favour a dissyllabic form. The OE. adj. *byrde* 'wealthy', or perhaps 'well-born, noble' answers phonetically, and the sense 'well-born' or 'wealthy *lady*', would apparently make it a suitable companion-word to *beorn*. But the rarity of the OE. adj. (found once, *Oros.* I. i. 15, and there masc., *se byrdesta* 'the wealthiest man') presents obvious difficulties.]

The prevalent form is now *burden*, but *burthen* is still often retained for 'capacity of a ship', and also as a poet. or rhetorical archaism in other senses. Of the senses in Branch IV, some are derived from the Romanic BOURDON[2], influenced by the Eng. *burden*; others belong to the native word with more or less influence from *bourdon*. IV. Senses showing confusion with Bourdon 2.

[The earliest quotation for Bourdon[2] shows that word already confused with this. Apparently the notion was that the bass or undersong was 'heavier' than the air. The *bourdon* usually continued when the singer of the air paused at the end of a stanza, and (when vocal) was usually sung to words forming a refrain, being often taken up in chorus; hence sense 10. As the refrain often expresses the pervading sentiment or thought of a poem, this use became coloured by the notion of 'that which is carried' by the poem: its 'gist' or essential contents.]

The form *brugh* is found in Burns and other writers of rustic dialect.]

1. Originally = BOROUGH; now restricted to denote a town in Scotland possessing a charter. (The earlier English instances will be found under BOROUGH; the examples given here are all Scotch.)

There are three classes of burghs, viz. *Royal burghs*, charter of which is derived from the king, *Burgh of regality* and *Burgh of barony*, having their charters respectively from a lord of regality and from a baron. Originally only the royal burghs sent representatives to Parliament.

A municipal tax of some kind; in ancient charters certain monasteries are exempted from paying it.

Cowell's guess (quot. 1607) adopted by later writers, appears to be founded on an erroneous derivation. Apparently the word became obs. early in 15th c.; perhaps even long before that time, as the examples in the later charters may be merely repetitions of a conventional formula.

Burglar (bə́·rglaɹ). Also 6 burglour, burghlar, burgleyer, 7 burglare, -layer. [Found in AFr. in 16th c.: ad. Anglo-Lat. *burglator* (13th c.), *burgulator* (16th c.), altered form of *burgator* (13th c.), perhaps f. the first element of *burgh-breche*, the native Eng. term for burglary. The Anglo-Lat. verb *burgulare* (*quasi* 'to burgle') is recorded in 1354 (*Assis.* 27 Edw. III, quoted in Reeves *Hist. Eng. Law* ed. Finlason II. 419). The 13th c. AF. word for 'burglar', *burgesour, burgeysour*, is of obscure formation, but of the same ultimate origin. The related Burglary is in legal AF. *burglarie*, in Anglo-Lat. *burgaria, burgeria* (early 13th c.), for which *burglaria* is found in 16th c. The origin of the intrusive *l*, in *burglator, burglaria*, and the corresponding Eng. forms, is not clear; but the notion of Lambarde (1581) and later writers that the ending *-lar* represents AF. *ler-s, laroun* (:—L. *latro, latrōnem*) thief, is contrary to the evidence. A 'burglator' or 'burgesour' was not necessarily a 'latro'; his object might be something else than plunder.

No corresponding words are known in continental OF. or med.L.; the rare OF. *burger* 'saccager, piller' (Godef.), occurring in Garnier's *Vie de Saint Thomas*, is unconnected, unless perhaps this sense of the word may be due to AF. influence.]

[The modern verb represents two earlier verbs, viz. (1) the intransitive strong vb., Goth. *brinnan*, (*brann, brunnum; brunnans*), ON. *brinna* (later *brennan*), OS., OHG., MHG. *brinnan*, OE. *brinnan*, by metathesis **birnan, bernan, beornan*, (*bran, barn, born, bearn; burnon, bornen*) 'arilere'; and (2) the derived factitive weak vb., Goth. *brannjan* (*brannida, brannips*), ON. *brenna*, OS., OHG. *brenn*(*i*)*an*, (MHG. and Ger. *brennen*), OE. *bærnan* (by metathesis for *brennan*), *bærnde*, 'urere'. *Beornan* and *bærnan* were still distinct in OE., but ran together early in the ME. period. ME. had four types of the present stem, *bern-, brin*(*n-, barn-, bren*(*n-, the two former of which appear to represent the intr., and the third the trans. OE. verb; *bren*(*n- appears to be mainly the ON. *brenna*, but may partly have originated by metathesis from *bern-*. Of the original strong verb, the strong pa. t. does not appear later than Layamon, and the distinction of transitive and intransitive was soon lost, the different types being used indiscriminately as to sense, though with dialectal preferences. *Brenne, brent* was the most common type in late ME., and even down to the 16th c., when it was somewhat abruptly dispossessed by *burn, burnt*, app. the descendant of the earlier *bern-, birn-*, though the continuity is not very clearly made out, as, between the 13th and 16th c., this type is scarcely recorded in Sc. writers.

In the Teut. *brinn-an* it is considered that only *brin-* (:– Aryan **bhren-*) belongs to the root, the second *n* being originally a present suffix: cf. OE. *bryne* :– OTeut. **bruni-s* burning. The root does not appear outside Teutonic: the comparisons often made rest on the untenable assumption that the *n* of *brin-* is not radical.

The distinction in usage between the two modern forms of the pa. t. and pa. pple. is difficult to state with precision. *Burnt* is now the prevailing form, and its use is always permissible; *burned* is slightly archaic, and somewhat more formal in effect; it occurs more frequently as pa. t., or in combination with the auxiliary *have* than as ppl. adj.]

Burough, -row, obs. ff. BOROUGH.

Burr, bur (bəː), *sb.*[1] Also 7 **burgh**, 6–7 **burre**. [Derivation obscure: nor is it at all clear whether the senses under II and III ought not to be treated as separate words. But the co-existence of the form BURROW *sb.*[5] (q. v.) with BURR sense 5, and its explanation as 'a circle about the moon', seem to identify this with the *burwhe*, *burrowe* of the Promptorium, the phonetic variants being analogous to *fur*, *furrow*; while the form *burgh*, besides *burre*, as well as the sense of II, appears equally to point back to the same ME. forms. For the source of the ME. see BROUGH.]

I. 1. General sense: A circle.

c 1440 *Promp. Parv.* 56 Burwhe, sercle [1499 burrowe], *orbiculus.*

II. A (? protecting) ring, etc.

† **2.** A broad iron ring on a tilting spear just behind the place for the hand. *Obs.*

(1660) 338 The Burre..is a broad ring of Iron behind the.. place made for the hand, which Burre is brought unto the Rest when the Tilter chargeth his Speare or Staffe.

3. A washer placed on the small end of a rivet before the end is swaged down; also (*Gunnery*) see quot. 1802.

1627 FELTHAM *Resolves* II. xxix. Wks. (1677) 218 A brawl .. which with all the burrs of silence should have still stood firmly riveted. 1802 C. JAMES *Mil. Dict.*, *Bur* [in *Gunnery*], a round iron ring, which serves to rivet the end of the bolt, so as to form a round head. 1851 *Ord. & Regul. Roy. Engineers* § 11. 51 Leather Pipes, joined by Copper Rivets and Burs. 1880 H. STUART *Seaman's Catech.* 5 Bolt and burr.

4. (See BURR-PUMP.)

III. 5. A circle of light round the moon (or a star); a BROUGH. The original sense seems to have been merely 'circle, halo'; but in modern use there is usually the notion of a nebulous or nimbous disc of light enfolding the luminary; as if modified by association with BUR *sb.*

1632 BRATHWAIT *Whimzies, Xantipp.* 104 A burre about the moone is..a presage of a tempest. 1794 G. ADAMS *Nat. & Exp. Philos.* IV. lii. 463 The stars seem..surrounded with a sort of burs. 1800 HERSCHEL in *Phil. Trans.* XCII. 499 Of Stars with Burs, or Stellar Nebulæ. 1851 NICHOL *Archit. Heav.* 128 The halo itself gradually sinking into a bur, or an atmosphere around a star.

Burr, bur (bəː), *sb.*[2] [Origin unknown.] The sweet-bread of a calf, sheep, etc.

1573 *Art of Limning* 10 To take grease out of parchement or paper: Take shepes burres and burne them to pouder, etc. 1730-6 BAILEY s.v., The Bur of a Beef, etc., the sweet bread. 1752 *Hist. Pompey the Litt.* 125 Sitting down to a breast of veal..raving at the landlord, because the bur was gone. 1834 ESTHER COPLEY *Housekpr's. Guide* v. 107 A sweet-bread (or burr)..boiled.

† **Burr, bur**, *sb.*[3] *Obs.* [Etymol. uncertain. Though the sense approaches that of BORE *sb.*[1], connexion with that appears to be phonetically impossible. Mr. E. B. Poulton suggests that the general notion is that of 'a roughness or scar, which looks artificial or as if resulting from accident—the look presented by an ear (beyond any other organ of special sense) in birds, and other animals which have not the external pinna possessed by mammals'. This would connect it with the following word, or even with BUR *sb.*]

The external meatus of the ear, the opening leading to the tympanum.

(This is clear in quot. 1688, since hawks have nothing but an opening; so practically the cropt-eared dog in quot. 1677; quot. 1573 refers to the secretion of wax in the meatus of the ear, and (as was formerly supposed) in the parotid glands or 'kernels of the ears' (though it might be read as identifying the 'burres' with the 'kirnels'). Dr. Johnson's explanation 'the lobe or lap of the ear' was an unfortunate guess, servilely followed by later dictionaries.)

1573 COOPER *Thesaurus*, *Parotis*..an impostume behinde the eares comming of a matter distilling from the heade into the burres or kirnels of the eares. 1677 *Lond. Gaz.* No. 1203/4 A Little White Shock Bitch .. cropt ears .. red above the burrs of her ears. 1688 R. HOLME *Armoury* II. 237/1 *Names of the parts of a Falcon*—Of the Head..The Burrs, or Ear burs, are the Ears. 1730-6 BAILEY, *Burr*, the round Knob of Horn next a Deer's Head; also the Burr of the Ear. [Hence in JOHNSON.]

Burr, bur (bəː), *sb.*[4] [app. the same word as BUR *sb.*; at least having some notion of roughness derived from it: but usually spelt *burr*, and therefore here treated apart.]

1. A rough ridge or edge left on metal or other substance after cutting, punching, etc.; e.g. the roughness produced on a copper-plate by the graver; the rough neck left on a bullet in casting; the ridge produced on paper, etc., by puncture.

1622 FLORIO, *Bocchino*..that stalke or necke of a bullet which in the casting remaines in the necke of the mould, called of our Gunners the bur of the bullet. 1784 E. DARWIN in *Phil. Trans.* LXXV. 5 A bur made by forcing a bodkin through several parallel sheets of paper. 1837 WHITTOCK *Bk. Trades* (1842) 214 The scraper..for rubbing off the burr or barb raised by the graver on the copper plate. 1846 *Print. Appar. Amateurs* 13 [In type-founding] when the waste piece of metal called the 'break' is broken off, the burr that is left is planed away. 1876 *Athenæum* 25 Nov. 693/3 Burr..is caused by the tearing up of the copper by the needle or burin. A ragged edge is left which holds the ink and gives a rich velvety effect. 1879 *Cassell's Techn. Educ.* IV. 127/2 A burr left at the hinder end of the thread [of a screw] which 'ragged' the wood.

2. Technical senses of obscure origin. [? With notion of 'something rough', or of 'tool for removing roughness'.] **a.** short for *burr-chisel*, *burr-drill*, *burr-saw*: see 3. **b.** (See quot.).

1794 *Rigging & Seamanship* I. 130 *Burr*, a triangular hollow chissel, used to clear the corners of mortises. 1823 J. HOLLAND *Manuf. Metals* II. 145 In the making of screws..workmen..use what they call a burr, or burring tool .. The burr is a square piece of steel .. having in the centre a hole screwed as accurately as possible with a square thread or worm.

3. *Comb.* **burr-chisel**, a three-edged chisel used to clear the corners of mortises; **burr-cutter**, **burr-nipper**, nippers for cutting away the burr from a leaden bullet; **burr-drill**, a dentist's drill with a serrated or file-cut knob or head; **burr-gauge**, a plate perforated with holes of graduated sizes, for determining the sizes of burr-drills; **burr-saw**, a small circular saw used in turning.

Burr, bur (bəː), *sb.*[5] Also **buhr**. [Origin uncertain: possibly identical with BUR *sb.*, being so called from its roughness.]

1. a. Siliceous rock capable of being employed for millstones. **b.** A whetstone.

1721 C. KING *Brit. Merch.* I. 288 Burrs for Mill-Stones. 1826 W. SMITH *Strata Identified* 12 Burs, or scythe stones. 1834 *Amer. Jrnl. Sci.* XXV. 233 Millstones equal to the best French buhrs. 1879 *Shropsh. Word-bk.*, *Bur*..a whetstone for scythes. 1880 JEFFERIES *Gt. Estate* 168 The French burrs..come over in fragments.

2. A siliceous boss or rock occurring among calcareous, or other softer, formations; a harder part in any freestone.

1839 MURCHISON *Silur. Syst.* I. iv. 49 Upright bands of hard sandstone, termed 'Burrs', which cut through the strata. 1865 I. TURNER *Slate Quarries* 16 Circular saws..are..unable to cut through 'burrs'..and other hard places.

3. *spec.* A term applied by quarrymen in Dorsetshire to a soft sandy limestone, with hard silicified bosses, above the 'Dirt bed' in the Lower Purbeck series. Also to a harder sandy limestone chiefly made up of comminuted shells, in the Upper Purbeck beds.

1829 T. WEBSTER *Observ. Purb. & Portland Beds, Trans. Geol. Soc.* Ser. II. II, Below this is another mass of calcareous stone, considerably softer..it is divided into two by a slaty bed, the upper being called aish, and the lower the soft burr. 1880 *Cornh. Mag.* 728 Above this we get the soft burr, a lake sediment. 1883 T. BOND *Corfe Castle* 51 The stone .. locally known by the name of Bur, is perhaps the most durable building stone in England.

4. A partly fused mass of brick; a clinker.

1823 P. NICHOLSON *Pract. Build.* 344 Burrs or Clinkers are such as are so much over-burnt as to vitrify, and run two or three together. 1864 *Daily Tel.* 2 June, The advisability of sinking brick burrs in different parts of the river. 1876 GWILT *Encycl. Archit.* § 1824 Burrs and clinkers are such bricks as have been violently burnt, or masses of several bricks run together in the clamp or kiln.

5. *attrib.*: see BURR-STONE.

Burr (bəː, bʊr), *sb.*[6] Also **burrh**. [app. imitative of the sound; though probably associated in idea with the roughness of a bur; cf. BUR *sb.*, esp. sense 4, *burr* in the throat.]

1. A rough sounding of the letter *r*; *spec.* the rough uvular trill (= French *r grasseyé*) characteristic of the county of Northumberland, and found elsewhere as an individual peculiarity. (Writers ignorant of phonology often confuse the Northumberland *burr* with the entirely different Scotch *r*, which is a lingual trill: see quots. 1835, 1873.)

1760 FOOTE *Minor* (1781) Introd. 9 An Aunt just come from the North, with the true NewCastle bur in her throat. 1805 R. FORSYTH *Beauties Scotl.* II. 57 From [the Tweed], southward as far as Yorkshire, universally all persons annex a guttural sound to the letter *r*; a practice which in some places receives the appellation of the Berwick *burrh*. 1835 W. IRVING *Crayon Misc.* (1849) 240 He spoke with a Scottish accent, and with somewhat of the Northumbrian 'burr'. 1873 J. A. H. MURRAY *Dial. S. Scotl.* 86 The northern limits of the *burr* are very sharply defined, there being no transitional sound between it and the Scotch *r*. Along the line of the Cheviots, the Scotch *r* has driven the *burr* a few miles back, perhaps because many of the farmers and shepherds are of Scotch origin. 1876 GREEN *Short Hist.* i. § 3 (1882) 25 The rough Northumbrian burr.

b. Hence, *loosely*, A rough or dialectal pronunciation, a peculiarity of utterance.

[(1) A Common Teut. strong vb.: OE. *berstan* (pa. t. *bærst*, *burston*, pple. *borsten*) = OFris. *bersta*, OS. *brestan* (*brast*, *bruston*; *brostan*), (MDu., Du. *berstan*, *barsten*, LG. *barsten*, *basten*), OHG. *brestan* (MHG. *brestan*, Ger. *bersten* from LG.), ON. *bresta*, (*brast*, *brustum*; *brostinn*), (Sw. *brista*, Da. *briste*):— OTeut. **brestan*, possibly from **brek-st-an*, a derivative (intensive) of *brek-an* to BREAK ².

(2) The earlier *brest-* of WGer. became by metathesis *berst-* in OE., Frisian, Du., and LG. (whence also it has passed into mod. Ger. in place of MHG. *brest-*). In Eng. this *berst-* mostly again became *brest-* in ME., partly perh under Norse influence, whence the pa. pple. *brosten* still, in north. dial.; but this has since the 16th c. gone back to *berst*, changed by the disturbing influence of *r* to *burst*. So that we have the alternate series OTeut. and WGer. *brest-*, OE. *berst-*, ME. *brest*, mod.Eng. *berst*, *burst*. But the 15–16th c. had often *brust* and *brast*, *barst* in the present; and the north. dial. had *brist*, *bryst*, as in Danish.

(3) The original strong conjugation survived during the ME. period, with the typical forms, after metathesis, *bresten*, *brast*, *brosten*, but with much disturbance and mixture of forms in 14–15th c. In the 16th c. a very common form was *brast* for all the principal parts; but about the end of that century, *burst* (for all the parts) began to gain the ascendancy which it has since maintained, though the pa. t. was frequently *brast* in 17th and the pa. pple. *bursten* till 18th c. Various old forms survive dialectally, and in U. S. the pa. t. and pple. are frequently *bursted*, vulgarly *busted*.]

Busard, obs. form of Buzzard 1.

Busby (bʊ·zbi). [Derivation unknown.

Busby is the name of an English village, and also a personal surname of some antiquity, well known as that of Dr. Richard Busby, Head Master of Westminster School 1640–1695.]

† **1.** A kind of large bushy wig. *Obs.*

1764 T. Bridges *Homer Travest.* (1797) II. 144 But I'm afraid we cannot get him A busby large enough to fit him. 1802 *Globe* 24 July 2 1 This 'Busby', so often used colloquially when a large bushy wig is meant, most probably took its origin, not..from Dr. Busby, the famous head master of Westminster School, but from the wig denominated a 'Buzz', from being frizzled and bushy.

2. A tall fur cap, with or without a plume, having a bag (generally of cloth, and of the colour of the facings of the regiment) hanging out of the top, on the right side; worn by hussars, artillerymen, and engineers; hence, one who wears a busby. Also *busby-bag.*

1807 (25 Dec.) in Malet *Hist. Rec. 18th Hussars* (1869) 16 Permission received to be clothed as Hussars—jackets light blue, silver lace; busby-bags blue. 1853 in Duncan *Hist. Royal Regt. 1. A measure of capacity used for corn, fruit, etc., containing four pecks or eight gallons.

The *imperial bushel*, legally established in Great Britain in 1826, contains 2218.192 cubic inches, or 80 pounds of distilled water weighed in air at 62° Fah. The *Winchester bushel*, much used from the time of Henry VIII, was somewhat smaller, containing 2150.42 cubic inches or 77.627413 pounds of distilled water; it is still generally used in United States and Canada. The bushel had a great variety of other values, now abolished by law, though often, in local use, varying not only from place to place, but in the same place according to the kind or quality of the commodity in question. Frequently it was no longer a measure, but a *weight* of so many 30, 40, 45, 50, 56, 60, 70, 75, 80, 90, 93, 220) pounds of flour, wheat, oats, potatoes, etc. A full account of these local values is given in *Old Country & Farming Words* (Eng. Dial. Soc.) 169.

Buskin (bʊ·skin). Also 6 **buskyn(g, busken,** 6–7 **buskine, busgin.** [A word existing in many European langs.: known in Eng. since 16th c. Cf. Fr. *brousequin* (16th c.), early mod. Du. *brōzeken* (now *broosken*), Sp. *borcegui*, formerly also *bozegui*, Pg. *borzeguim* (Dozy cites as earlier forms *morsequill, mosequin*), It. *borzacchino*; the synonymous Fr. *brodequin*, Brodekin, q. v., is doubtless related, but the phonetic relations are obscure. The special source of the Eng. is uncertain: the early mention of 'Spanish buskin' might suggest that it was adopted from Spain, a view in some degree supported by the fact that OSp. *bozegui* (Minsheu) is the only continental form without the *r*. (The Sp. word appears to have originally had a final *n*: cf. *borcegueinero* buskin maker.) But it is not impossible that the Eng. word was corrupted from Fr. or Du. The ultimate etymology is unknown. Diez regarded the Romanic words as a. Du. *brōzeken*, and this as a dim. of *brōse*, supposed by him to be ultimately ad. late L. *byrsa* leather. But the wide diffusion of the word in Romanic and its late appearance in Du. are inconsistent with this hypothesis, which Dutch etymologists decisively reject (see Brodekin); and the Romanic forms do not admit of derivation from *byrsa*. The appearance of the Sp. and Pg. words suggests an oriental origin, but the Arabic etymology proposed by Dozy is far-fetched and untenable. The OF. *broisequin, bruquin*, the name of a woollen fabric, is prob. unconnected; Godef. says that the material was so called from its colour: cf. Brusk.]

Bustard (bʊ·stăd). Forms: 5–6 **bustarde**, 4– **bustard**; also, 6 **bistarda, bistarde, bystarde**, 7 **bistard.** [The form *bustard* in 15th c. appears to be exclusively English, and looks like a mixture of the two OF. forms *bistarde* and *oustarde*, both going back to L. *avis tarda*, the name given to the bird, according to Pliny, in Spain. This name, if purely Latin, would mean 'slow bird', but 'the application of the epithet is not understood' (Prof. Newton), as the bird is remarkably swift on foot, and, though averse to flight, capable of great speed when compelled to take wing. Prof. Newton suggests that *tarda* may have been a sb.; perh. *avis tarda* is a mere etymologizing alteration of a non-Latin name. Hence Pg. *abetarda*, *betarda*, Sp. *avutarda*, It. *ottarda*, Pr. *austarda*. The Eng. form *bistard* was of later appearance, taken directly from Fr.]

1. Occupied with constant attention; actively engaged; doing something that engrosses the attention. Said of persons; also of the mind, the hands, a mental faculty, or the like. (Rare in attrib. use.)

In the earlier examples (esp. those under b and d) this sense is often not to be distinguished from that of 'careful, eager, anxious'. The latter notion has now disappeared, though a trace of it is found in Johnson's definition, 'employed with earnestness', which does not quite agree with the present usage.

But (bət), *prep., conj., adv.* Forms: 1 **be-útan** (only as *prep.* or *adv.*), **bútan, -on, -un, búta, búte**, 2-3 **buten**, 2-4 **bute**, (2-3 **boten**, 2-4 **bote**, 3-7 *Sc.* **bot**), 3- **but**. [The OE. adv. and prep. *be-útan, bútan, búta*, 'on the outside, without', of which the strong form regularly became in ME. *bouten, boute*, BOUT, as adv. and prep., was phonetically weakened to *bûten, bûte, but*, as a conjunction, with uses arising immediately out of the prepositional sense. In some of these uses, the conjunction is, even in modern English, not distinctly separated from the preposition: the want of inflexions in substantives, and the colloquial use of *me, us*, for *I, we*, etc., as complemental nominatives in the pronouns, making it uncertain whether *but* is to be taken as governing a case. In other words 'nobody else went but me (or I)' is variously analysed as = 'nobody else went except me' and 'nobody else went except (that) I (went)', and as these mean precisely the same thing, both are pronounced grammatically correct. (See Latham, *Eng. Lang.* ed. 1850, p. 483; also F. Hall, *Modern English* 104, 303, *notes.*) In colloquial use *me, us*, etc., are more common than *I, we*, etc.; in literary use, the point is usually avoided by substituting *except, save*, or otherwise altering the phraseology. In certain phrases the conjunctional *but* develops, by ellipsis of a preceding negative, the adverbial sense 'only': see C. 6 below. Otherwise the modern use of *but* as a preposition or adverb is only Scotch; the form BOUT which was the regular ME. repr. of OE. *bûtan* as prep. and adv. having become obsolete by 1500.]

C. *conj.*

General Scheme. I. In a simple sentence. II. In a complex sentence. III. In a compound sentence, or introducing a consequent sentence. IV. In phrases.

I. In a simple sentence; introducing a word or phrase (rarely a clause) which is excepted from the general statement : Without, with the exception of, except, save.

1. After universal statements with *all*, *every*, *any*.

† **a.** In OE. construed as a *prep.* with dative. (See A. 3.)

a 1000 *Beowulf* 705 (Z.) Ealle buton anum. *c* 1000 ÆLFRIC *Job* (Ettm.) iv. 15 Ealle þa þing..buton þam anum.

b. In ME. and modern use weakened to a conjunction, as in 3 and 4.

(*a.*) This is shown before a nominative pronoun.

c 1460 *Towneley Myst.* 23 Alle shalle be slayn but oonely we. *a* 1835 MRS. HEMANS *Casabianca* 2 The boy stood on the burning deck, Whence all but he had fled. 1872 J. H. NEWMAN *Disc. & Arguments* 6, I am one among a thousand; all of them wrong but I. [*Colleq.* also, 'but me']

(*b.*) Otherwise, on account of the levelling of inflexions, the case is not shown, or may be independent of *but* (quot. *a* 1000), or *but* introduces a phrase.

a 1000 *Panther* 16 Gr.) Se is æthwam freond butan dracan anum. *a* 1300 *Cursor M.* 763 Sua do we [ete] Of al þe tres bot of an. 1423 JAS. I *King's Q.* 94 With wingis bright, all plumyt, bot his face. 1596 *Edw. III*, II. i. 13 Wisdom is foolishness, but in her tongue. 1599 NASHE *Christ's T.* 57 b, If wee did imitate ought but the imperfections of Beastes. *a* 1618 RALEIGH *Verses* (Mildmay MS.) Love all eaten out but in outward showe. 1681 DRYDEN *Abs. & Achit.* 56 And thought that all but Savages were Slaves. 1801 MAR. EDGEWORTH *Moral T.* (1816) I. ix. 68, I can bear any thing but contempt. 1838 THIRLWALL *Greece* V. xxxix. 81 It [an oath] was taken .. by all but the Eleans. *Mod.* Any thing but that! Any one but a fool would understand. Anywhere but in England. At any time but the present. Everybody but you has signed.

c. *All but* : everything short of. Hence, *advb.* Almost, very nearly, well nigh : see ALL A. 8 b.

2. After *only*, or a superlative. Const. as in 1 b.

1580 NORTH *Plutarch* 672 The first time that ever the two Kings were of one House but then. *Mod.* The only person I have met but you. He is last but one in the class.

3. After interrogatives (*who*, *what*, etc.) *but* was already in OE. construed as a conjunction, not affecting the case of the following sb. or pronoun, which depends upon the expansion of its own clause. This appears to have been universal in ME., and is regular now. Only rarely in modern times is *but* treated as a preposition governing the word.

a. With pronouns showing the case.

a 1000 *Crist* 693 (Gr.) Hwæt sindon þa gimmas butan god sylfa. *c* 1380 WYCLIF *Serm. Sel. Wks.* I. 279 Who shulde be dampned but þou? 1786 COWPER *Gilpin* 123 Away went Gilpin—who but he? 1777 SHERIDAN *Sch. Scand.* ii. Come—for, but thee, who seeks the Muse? *Mod.* Is there any one in the house but she? (*or* but her?) Who could have done it but he? (*or* but him?).

b. Otherwise the case is not shown, or is objective independently of *but*.

c 1300 *Cato Major* IV. v, What prou may þi catel do But hele wol with þe dele? *c* 1440 *Gesta Rom.* (1878) 123 What dude he but yede, and purveyde him of iij. cautils. 1576 GASCOIGNE *Steel Gl.* Arb.) 60 What causeth this, but greedy golde to get? 1602 WEEVER in *Shaks. C. Praise* 48 Who but Brutus then was vicious? 1790 BURKE *Fr. Rev.* 339 Who but the most desperate adventurers .. could at all have thought of [it]. 1879 BLACK *Adv. Phaeton* xxiv. 336 What must she do but immediately turn to the Lieutenant? *Mod.* Whom could he mean but me? Why have they come but to annoy us?

4. So after a negative, expressed or implied. (Here *but* regularly translates L. *nisi*, and may be explained as 'unless, if not'. It has been treated as a conjunction from the earliest times.)

† **a.** With sb. or pron. as compl. to *be* : see 6 a.

c 893 K. ÆLFRED *Oros.* I. i, Þær næran butan twegen dælas. *a* 1225 *Leg. Kath.* 282 Þer nis bot a Godd. *c* 1240 *Urrisun* in *Lamb. Hom.* 185 Ajein hwam þe sunne nis boten a schadwe. 1340 *Ayenb.* 258 Þe saredinge þet ne asolde by bote a tokne..of þe asame of his vader. 1393 LANGL. *P. Pl.* C. I. 205 Ther þe cat nys bote a kyton. *Ibid.* XX. 149 Alle þre nys bote o god.

b. With a sb. or pronoun whose case depends on its own clause. (*a.*) The case is now shown only in a personal pronoun.

a 1000 *Phanlx* (Gr.) 358 Ne wat ænig butan metod ana. *a* 1000 *Seafarer* (Gr.) 18 Ic ne gehyrde butan hlimman sæ. *c* 1000 *Ags. Gosp.* Matt. xi. 27 Nan mann ne can þone sunu butun fæder [*Lind.* buta ðe fæder; *Hatt.* buto se fader; Vulg. *nisi pater*]. *c* 1230 *Hali Meid.* 21 Ne moten nane bute heo hoppen ne singen. 1330 R. BRUNNE *Chron.* 183 No body bot he alone vnto þe Cristen cam. ?*c* 1370 *Robt. K. Cicyle* 62 There was lefte noon but he allone. *c* 1380 WYCLIF *Sel. Indies* 26 None but he and his men can tell, what is become of them. *a* 1841 ARNOLD *Fragm. on Church* (1843) 223 None but they..have a right to rule in the Church.

(*b.*) Otherwise, on account of the levelling of inflexions, the case is not shown, or would be objective independently of *but* (as in quot. 1300, 1 : 99, 1808).

1154 *O. E. Chron.* (Laud MS.) an. 1135 Durste nan man sei to him naht bute god. *c* 1200 *Moral Ode* in *Trin. Coll. Butt (bʊt), *sb.*[3] Forms: 5 **bott**, **butte**, 5–8 **but**, 7– **butt**. [First appears in 15th c., but must be much older if Buttock (13th c.) be a dim. of it. Of obscure etymology: words apparently cognate are ON. *butt-r* ('short' Vigf.; but occurring only as a nickname); Da., LG. *but*, Du. *bot*, blunt, short, thickset, stumpy; Sp., Pg. *boto* blunt, F. *bot* in *pied-bot* (club foot). F. *bout* end (OF. also *bot*, *but*) is apparently not connected with these words. It has naturally been thought of as the source of the Eng. word, but it does not appear to be recorded in the specific sense of 'thick end'. But cf. Butt *sb.*[4]]

1. The thicker end of anything, *esp.* of a tool or weapon, the part by which it is held or on which it rests; e. g. the lower end of a spear-shaft, whip-handle, fishing-rod, the broad end of the stock of a gun or pistol.

Butyl (bi·ūtil). *Chem.* [f. BUT-YRIC (f. L. *butyrum* butter) + -YL. So called from its relation to *butyric acid*, q. v.]

1. The monatomic alcohol radical of the tetracarbon series, C_4H_9, called by its discoverer Corbet *Valyl*, and by later chemists also *Tetryl*, and *Quartyl*.

(There are four isomeric modifications of TETRYL,
$CH_3CH_2CH_2CH_2$, $(CH_3)_2.CHCH_3$,
$C_2H_5.CH.CH_3$, $(CH_3)_3.C$,

of which the second or *Isobutyl* is the butyl of Wurtz, 'a colourless oily liquid, having a faint but agreeable odour, and a slight taste with burning after-taste' (Watts).

1868-77 Watts *Dict. Chem.* (1879) V. 732 Tetryl or butyl. *Ibid.* VI. 373 With sodium it gives off..but little butyl. 1870 Tyndall *Heat* xv. § 750 It is called nitrite of butyl.

2. *attrib.* Of butyl, butylic, tetrylic: as in *butyl compounds, group, series*; also *butyl acetate, aldehyde, chloride, oxide, sulphide*, etc.; and esp. in **butyl alcohol**, $C_4H_{10}O$, of which there are four isomers, 1. *normal butyl alcohol* or *propyl carbinol* (which yields butyric acid), 2. *fermentation* or *isobutyl alcohol* or *isopropyl carbinol*, 3. *secondary butyl alcohol* or *methyl-ethyl carbinol*, 4. *tertiary butyl alcohol* or *trimethyl carbinol*; **butyl hydride** = *quartane*, a volatile hydro-carbon C_4H_{10}, the lightest of all known liquids; **butyl aldehyde**, the same as *butyric aldehyde*. So many other combinations as *butyl carbinol, butyl benzene*, etc.

1869 Roscoe *Elem. Chem.* (1874) 330 Butyl hydride..is the lightest of all known liquids. *Ibid.* 331 This [normal butyl alcohol] is the primary alcohol, as it yields on oxidation butyl aldehyde and butyric acid. 1869-72 Watts *Dict. Chem.* (1879) VI. 373 *Isopropyl-carbinol* or *isopropionary-butylic Alcohol* constitutes the butylic alcohol of Wurtz, which was extracted from fusel-oil. For a long time it was the only butyl alcohol known to chemists. 1873 Fownes *Chem.* 599 Butyl-carbinol is prepared from normal butyl alcohol in the same manner as the latter from normal propyl alcohol. 1880 *Med. Temp. Jrnl.* July 167 He found that butyl and propyl alcohols were possessed of strong toxic properties.

3. Hence derivatives in **Butyl-**: **Butylactic**, in *Butylactic acid*: the monobasic acid, $C_4H_8O_3$, derived from Butyl glycol; the tetracarbon or Butylene member of the Lactic series. **Butylamide**, a less correct name for Butyramide. **Butylamine**, an Amine, or compound ammonia of the butyl series. **Butylene**, the diatomic hydro-carbon or olefine of the butyl series, C_4H_8, also called *Butene* and *Tetrene*, of which there are several isomeric modifications; in comb. as *butylene alcohol*, etc. **Butylenic** *a.*, of or pertaining to Butylene. **Butylic** (bi͡ytĭ·lik) *a.*, of or pertaining to Butyl, as in *butylic alcohol, butylic ether*, etc.

1863-72 Watts *Dict. Chem.* I. 688 Butylactic acid bears to butyric acid the same relation that lactic acid bears to propionic acid. *Ibid.* (1877) V. 733 Tetrylic or butylic alcohol of fermentation is a primary alcohol. 1877 — *Fownes' Chem.* II. 57 Butene or Butylene—of this hydro-carbon there are three modifications..*Normal butene, Pseudo-butene, Isobutene.*

Butyr. *Chem.* An adaptation of L. *butyrum* Butter, sometimes used in technical senses.

1840 H. Clèvre in *Jrnl. Agric. Soc.* I. III. 321 Butyr, (or, as it is commonly called, butter) of antimony. 1882 *Chemist & Drug.* XXIV. 56/1 Butyr of antimony, oil of vitriol, etc.

Butyr-, a formative of the names of chemical compounds belonging to or derived from the butyric series, and of some minerals. (Cf. Butyro-.)

Butyraceotic acid, an acid having the composition of a combination of butyric and acetic acid, $C_3H_6O_2 \cdot C_2H_4O_2$, also called *pseudo-acetic acid*; its salts are **Butyracetates**. **Butyral, Butyraldehyde**, two isomeric compounds, C_4H_8O, aldehydes of the butyric series. **Butyramide**, the amide of the butyric series, $C_3H_7O.NH_2$, crystallizing in snow-white nacreous tables. **Butyrate**, a salt of butyric acid. **Butyrellite**, *Min.*, Dana's name for the natural fatty substance, *bog-butter*. **Butyrin**, an oily liquid analogous to the acetins, obtained by the direct action of butyric acid on glycerin. **Butyrite** *a. Chem.*, a compound formed from butyric acid and mannite (Watts); b. *Min.*, another name for *Butyrellite*. **Butyrone**, the ketone of the butyric series, also called dipropyl ketone CO. $(C_3H_7)_2$. **Butyryl**, C_4H_7O, the radical of butyric acid.

1846 Henry *Chem.* II. 446 This oil [butter], according to Chevreul, is resolvable into two; the one..he calls butirine, because it contains butyric acid or its elements. 1839-47 Todd *Cycl. Anat.* III. 359/1 Butter may be regarded as composed of..stearine, elain, and butyrine. 1873 Fownes *Chem.* 547 Several of the paraffins are produced by the dry ..distillation of butyrates. 1833 *Pharmacent. Jrnl.* XIII. 72 The Chloride of Butyryle is..liquid. 1869-72 Watts *Dict. Chem.* (1879) VI. 380 Butyryl..is an aromatic oil, slightly soluble or insoluble in water.

Butyraceous (bi͡ytĭrē·ʃəs), *a.* [f. L. *butyrum* butter + -aceous: cf. F. *butyracé*.]

1. Of the nature of butter; buttery.

1668 *Phil. Trans.* III. 887 Milk..whence, and from the three parts whereof, viz. Butyraceous, Serous, and Caseous ..he would deduce the different nature of the Humors and Spirits composing the blood. 1778 *Anat. Dialogues* 6 An oleaginous or butyraceous matter. 1844 T. Graham *Dom. Med.* 174 Whey is the watery saccharine part of milk, freed in a great measure from the butyraceous and caseous matters. *Ag.* 1870 Lowell *Study Wind.* 249 If repugnance for having fine phrases take the place of butyraceous principle.

2. Producing or containing butter.

1863 R. Burton *Abeokuta* I. 304 The varieties of butyraceous nuts are almost wholly unknown. 1876 — *Gorilla L.* I. 220 The Nje or Njeve, a towering butyraceous tree.

Butyric (bi͡ytĭ·rik), *a. Chem.* [f. as prec. + -ic.] Of or pertaining to butter, *esp.* in reference to its chemical constitution and formation. Hence:

1. *Butyric acid*, the monatomic, monobasic, fatty acid of the Butyl series, $C_4H_8O_2$, of which there are two modifications, *normal butyric* and *isobutyric* acid; the former occurring in butter, cod-liver oil, and other substances, is a colourless viscous liquid, with a smell suggestive of both vinegar and rancid butter. Its salts are *butyrates*.

1808 [see Butyr-]. 1839-47 Todd *Cycl. Anat.* III. 359/1 Chevreul..has named them the butyric, caproic, and capric acids. 1845 G. Day *Simon's Anim. Chem.* I. 78 By..fermentation butyric acid may be obtained from sugar..the fermentation, at first viscous, subsequently lactic, gradually becomes butyric. 1871 Tyndall *Fragm. Sc.* (ed. 6) II. xii. 275 Air..is according to Pasteur, absolutely deadly to the vibrios which provoke the butyric acid fermentation.

2. *Butyric series*: the series of compound bodies related to Butyric acid, or containing the radical Butyryl, C_4H_7O; as *Butyric aldehyde*, C_4H_8O; *Butyric ether* or *Ethyl butyrate*, $C_2H_5 \cdot C_4H_7O_2$, a colourless oily liquid, having a pleasant fruity odour; *Butyric anhydride* or *oxide* $(C_4H_7O)_2O$.

1854 Scoffern in *Orr's Circ. Sc.* Chem. 109 Butyric ether and butyric methyl ether. 1863 Watts *Dict. Chem.* (1879) I. 695 To the presence of small quantities of butyric ether, the peculiar flavour of pine-apples, melons, and some other fruits is due. *Ibid.* Butyric anhydride is a colourless, very mobile, and highly refracting liquid.

Hence **Butyrically** *adv.*

1876 tr. *Schutzenberger's Ferment.* 207 A great number of compounds are susceptible of fermenting butyrically.

Butyro- (bi͡ytĭ·rō, comb. form of L. *butyrum*, used in technical, chiefly chemical words, as *butyro-acetic*, combining butyric and acetic. Cf. Butyr-.

c 1865 *Circ. Sc.* I. 336/2 The chemist calls these butyric, butyro-acetic, and formic acids.

Butyrous (bi͡ytĭrəs), *a.* [f. L. *butyr-um* + -ous, corresp. to F. *butyreux*.] Of the quality or nature of butter; butyraceous, buttery.

1669 Boyle *Contin. new Exp.* II. (1682) 217 To separate the Butyrous from the Caseous part. 1683 G. Harvey *Curing Dis. by Expect.* vi. 39. 1774 A. Hunter *Georgic. Ess.* (1803) III. 257 The cream was of a thick butyrous consistence.

Hence **Butyrousness**, buttery quality.

By, *sb.*[2]; see after BY *prep.* and *adv.*

By (bəi), *prep., adv.* (*a., sb.*) [OE. *bī* (*big*) accented; *bī, be* unaccented, = OFris, OS.. MDu., *bī, be*, (Du. *bij, be-*), OHG. *bī, bi, bi-* (MHG. *bī, be-*, Ger. *bei, be-*), Goth. *bi, bi-* 'about, by':—OTeut. **bi*, prob. cognate with L. *am-bi-* prefix, Gr. ἀμφί, prep. and prefix 'about'. (For the disappearance of *am-* in Teut., cf. OTeut. *bo-*, with L. *am-bo-*, Gr. ἀμ-φο- both) Originally an adverbial particle of place; when prefixed to a verb it generally coalesced with the latter, and was treated as a prefix; when construed with substantives (in the dative or accusative, according as the relation was that of *being* near, or *moving* near *to*), it became, like other adverbs, a preposition. Cf. the series: 'þæt folc bī stód (bi-stód)', 'þæt folc him bī stod (him bi-stód)', 'þæt folc stód him bī,' 'the folk stood by him', and the mod.English, 'to stand by, stand by him, be a bystander'.

The single form *bi* of OTeut. was subsequently, under the influence of the stress, differentiated into the strong or accented *bī, bī* (*by, bij, bei*), and the weak or stressless *bi*, later *bə*. The strong form was used for the adverb, the accented prefix of nouns, and a stressed preposition; the weak form for the stressless prefix of verbs, and a stressless preposition. The influence of levelling, however, tended at length to make *bī* (*by*, etc.) the separate form in all cases, and to leave *be-* as the weak prefix; thus, while in OE. the prep. was both *be* and *bi*, in ME. it was usually written *bi, by*, and modern Eng. makes the preposition, like the adverb, *by*, in all positions and senses, and has *be-* only as a stressless prefix. The same is true of mod.Ger. *bei, be-*, and Du. *bij, be-*. But in pronunciation there was a weak and a strong form in ME. (cf. forms like *be-sides, be-times, bum troth, bum Lady, byrlady*), as is still usual in the dialects. In modern Sc. *bē* is the ordinary form of the preposition unaccented, or in a weakened sense, as in 'sit be the fire', 'written be a clerk', 'ane be ane', *by* the form of the adverb and strong preposition, as in 'stand by', 'to pass *by* a place *be* the railway'. This use of *be* as preposition has been uniform in the northern dialect since the earliest preserved ME. specimens.]

A. *prep.* Forms: 1–2 be, 1–5 bi, 1 bi (bię), 3– by, (4 bie, 5 bye, *north.* 3– be). (Formerly often placed after the governed word, which may still be done in verse).

2. In forms of swearing or adjuration.

Here *bi* is the original prep. in Teutonic (Goth., OHG., OS.), and must have had a local sense, 'in presence of', or perhaps 'in touch of' some sacred object: in ON. where *bi* was entirely lost, *at* appears, and must have been local. But in OE. literature the prep. was ordinarily *purh*, perhaps after L. *per*; though *be* occurs in one place in the Rushw. Gloss. and may represent native usage. It is thus not certain how far the ME. use of *by* was native, or how far it was a translation of F. *par*, of instrumentality. To modern apprehension there is apparently no notion of place, but one approaching that of instrumentality or medium. See Swear. Cf. Before 6.

By- in composition.

A. A ME. variant spelling of the prefix BI-, BE-, under which see most of the words, as, under BE-, *bycause, bydene, bydryve, byfall, byfore, byget, bygynne, bygile*, etc.; under BI-, *byreusy, byweve*, etc. Those words only are given under BY- for which no forms with *be-* or *bi-* have been met with.

B. BY- (sometimes bye-): the preposition, adverb, or adjective BY in combination, either in words already formed in OE. with the accented form of the prefix, *bí-, big-*, or in words of later formation, especially those in which *by* has an attributive sense, and cannot be separated by any clear line from BY *adj.*, since the use of the hyphen is very uncertain. All the principal words so formed are treated as main words in their alphabetical places; the less important and more obvious combinations here follow, under the various uses and senses of the prefix.

I. 1. Compounds in which *by-* is a prep., as **by-rote** *a.* See also *by-hither, by-south* (BY *prep.* 9 c), *by-ordinary, by-common*, etc. (BY *prep.* 7), and BYHAND.

(The two crowns [? of England and France] with which the bycoket of Henry VI was 'garnished' or 'embroidered', were, of course, no part of the ordinary bycoket.)

¶ Through a remarkable series of blunders and ignorant reproductions of error, this word appears in modern dictionaries as Abacot. In Hall's Chron. *a bicocket* appears to have been misprinted *abococket*, which was copied by Grafton, altered by Holinshed to *abococke*, and finally 'improved' by Abraham Fleming to *abacot* (perhaps through an intermediate *abacor*); hence it was again copied by Baker, inserted in his *Glossarium* by Spelman, and thence copied by Phillips, and so handed down through Bailey, Ash, Todd, etc., to 19th century dictionaries (some of which provide a picture of the 'abacot'), and even inserted in dictionaries of English and foreign languages.

1548 Hall *Chron. Edw. IV* an. 2 One of them had on his hed the said Kyng Henrie's helmet (some say his high cap of estate), called abococked [*ed.* 1550 abococket], garnished with two riche Crownes. 1568 Grafton *Chron.* II. 661 His high Cap of estate, called Abococket. 1577 Holinshed *Chron.* 1314 His highe cappe of estate, called abococke. 1587 *Ibid.* (ed. Fleming) called Abacot. 1664 Spelman *Gloss., Abacot*: pileus augustalis Regum Anglorum a coronis insignitum *V. Chron.* An. 1463, Ed. 4, pag. 666, col. 2, l. 27 [*i. e.* Holinshed]. 1696 Phillips, *Abacoc* [1706 *Abacot*], the Regal Cap of Maintenance of the Kings of England adorn'd with two Crowns. 1721 Bailey, *Abacot*, a Cap of State, made like a double Crown, worn anciently by the Kings of England. 1775 in Ash. 1820 *New Dict. Bye (bəi). [Variant spelling of By *prep.* in its subst. use.]

1. A term used in various games and sports:

a. *Cricket.* A run scored for a ball which passes the batsman, and which the wicket-keeper and long-stop fail to stop. *To steal a bye*: to make a run for a ball by starting the instant it passes the wicket-keeper. *Leg-bye*: a run obtained for a ball diverted by grazing the batsman's person.

1746 in 'Bat' *Cricket Manual* (1850) 80, Byes..3. 1857 T. Hughes *Tom Brown* II. viii, He has stolen three byes in the first ten minutes. *Ibid.* The ball..rises fast, catching Jack on the outside of the thigh, and bounding away as if from india-rubber, while they run two for a leg-bye amidst great applause. 1880 *Times* 28 Sept. 11/5 When a bye was obtained stumps were drawn.

b. in *Tennis, Boxing, Coursing, Cockfighting*, etc.: The position of an individual, who, in consequence of the numbers being odd, is left without a competitor after the rest have been drawn in pairs. Hence the phrases *To draw a bye, to run a bye*, etc.

1883 *Field* 22 Dec. 863 To do away with byes in the penultimate and final rounds of [lawn-tennis] matches. 1887 *Daily News* 23 Feb. 3 7 The latter had had the benefit of drawing the bye in the second round. 1848 Craig s.v. *Bye*, In Coursing, a dog is said to 'run a bye' when it runs a course against another *not* in the match—thus equalising its runnings to the other dogs *in* the match. 1883 *Field* 22 Dec. 857 Sabrina then ran her bye, which she won.

c. in *Lacrosse*, etc.: A goal; a starting line.

1842 Catlin *N. Amer. Ind.* (1844) II. xlix. 224 Erecting the 'byes' or goals which were to guide the play. 1847-78 Halliw., *By*, the point or mark from which boys emit the marbles or tawa. *Yorksh.*

d. A by-match or 'event'; one not in the programme.

1884 *L'pool Daily Post* 30 June 6/5 [Cockfighting] Some byes afterwards took place.

2. The name of a plot against the government of James I. (So called in opposition to the *Main* plot: the relation between the two is one of the disputed points in English history. Cf. By *sb.* 1.)

1603 *St. Trials*, You are fools, you are on the bye, Raleigh and I are on the main; we mean to take away the king and his cubs. [1888 Low & Pulling *Dict. Eng. Hist.* s.v. *Bye Plot*. It is certain that the Bye Plot had no connection with the Main or Raleigh's Plot.] 1886 C. E. Doble in Hearne *Collect.* (1886) II. 436 Wm. Clarke was executed at Winchester, for his participation in 'the Bye', Nov. 29, 1603.

Bylaue, var. of BELEAVE *v. Obs.*

By-law, bye-law (bəi·lɔ). Also 4 bilage, 4–6 bilawe, 6 7 by-lawe. [In sense 1 apparently (from the identity of meaning, and the identification of *bylaw-man* (see below) with *byrlaw-man*) a doublet of BYRLAW. The difference of form would be explained by the derivation of *bylaw* from the stem instead of the genitive case of ON. *by-r*, Sw. and Da. *by*, 'dwelling-place, farm, village, township, town': cf. the Dan. *bylag*, Sw. *byalag*, *bylag*, mentioned below. It is less probable that *bylaw* might be formed in England itself from the same elements: cf. BY *sb.*[1]; but it might be a corruption of *byr-law* either phonetic, or due to confusion with the adverbial prefix BY-. The earliest examples of the word refer to Kent: the difficulty of assigning a Scandinavian etymology to the local name of a Kentish custom is obvious, but cf. quot. 1292 under BYRLAW from an assize held in Devonshire, and quot. 1370 for the general use of *bylaw* in sense 2. Sense 3 however shows that the word was in the 16th c. used as if f. BY *adv.* + LAW, analogous to *by-name*, *by-path*, *by-way*; and this is the way in which sense 2 is now understood and used. This may have been, in its origin, merely a mistaken interpretation, but it is also possible that a word may have been formed independently from these elements, without influence of the Scandinavian word, although naturally falling together with it in the general sense of subsidiary or side-law.

The compounds actually found in the Scandinavian langs. are Da. *bylag*, explained by Molbech as 'Forening imellem alle eller endeel Bönder i en Landsby, Bymenighed', i. e. 'association between all or some of the farmers in a rural township, *bymenighed*', the latter being further said to be 'the community of citizens in a town, of farmers in a rural township, etc.'; also Sw. *bvalag*, *bylag*, village community. In ON. *lag* had, among other senses, that of 'fellowship'; the pl. *lög* those of 'law', 'law-community or association', and 'law-district' (cf. the *Dena-lagu* or *Dane-law*). The sing. has given Sw. and Dan. *lag et*; the pl. Sw. *lag-en*, Da. *lov-en* 'law'. The word *belagines*, alleged by Jordanis to be Gothic for 'written law', has sometimes been referred to in this connexion; but it can have no relation to the Eng. word.]

† **1.** Apparently the same as BYRLAW: occurring in the 13th c. as the name of a custom (in Kent) according to which disputes concerning boundaries were settled outside the law courts, on the testimony of neighbours, by official or specially deputed arbitrators. *Obs.*

1283 in W. Thorn *Chronica* (Twysden p. 1936) [Abbas Nicholaus ordinavit] Item si contingat quæstionem moveri inter nos [monks of St. Augustine, Canterbury] & archiepiscopum vel ejus tenentes de subtractionibus, purprestur is, dampnis seu aliis injuriis hinc inde factis, quod consuetudo illa quæ dicitur *bilage* observetur. 1303 *Ibid.* Ad sextum articulum petitur, quid intelligitur per hanc dictionem Bilage. b. Often specially applied to ordinances made by common assent in a Court-leet or Court-baron. Cf. BYLAW-MAN.

1607 COWELL *Interpr.*, *Bilawes* [*ed.* 16 *adds* 'or rather *By-lawes*, that is Laws made *obiter* or by the *By*'] are orders made in court leets or court Barons by common assent, for the good of those that make them, farder then the publique law doth binde. Hist.* I. v. 91 In the courts of the manor are transacted the other remaining portions of the old township jurisdiction; the enforcing of pains and penalties on the breakers of by-laws, etc.

c. In Old Danish, *bylag* had also the sense 'Payment or contribution in order to receive citizenship or the freedom of the *by*' (see Kalkar); the following quotation applies the name to a proportional charge or assessment made for a local purpose: cf. 1642 in b.

1692 BLOUNT *Law Dict.* s.v. *Bi-scot*, 9 Edw. 3, At a Session of Sewers held at Wigenhale in Norfolk, it was decreed, That if any one in those parts of Marchland, should not repair his proportion of the Banks, Ditches and Causeys, by a day assigned, *alid.* for every Perch unrepaired (which is called a Bilaw should be levied upon him.

2. A 'law' or ordinance dealing with matters of local or internal regulation, made by a local authority, or by the members of a corporation or association. More particularly: An ordinance made by the members of a corporation for the better government of their own body, or for the regulation of their dealings with the public; in modern times most commonly (as by railway companies) in the exercise of powers expressly conferred by the Legislature.

Byrlaw. *arch.* or *dial.* Forms: 3 **birelage, birlawe**, (**birelegia**), 5–7 **byrelaw(e**, 6 **byer-law**, 6–7 **berlaw, burlaw**, 7–8 **birlaw**, 9 **bourlaw**, *dial.* **byar law**, 6- **byrlaw**; also corrupted, esp. in comb., into 6 **byerley, byrla, birla**, 7 **birlay, burlie**, 7–8 **birley**, 8–9 **birlie**, 9 **burley**; see Birley, Bourlaw, Burley, Bylaw. [app. a. ON. **býjar-lög*, f. *býjar* gen. case of *býr* (= By *sb.*), dial. variant of *bær* (*bær*) village, town, farm + *lög* (pl. of *lag*) law, 'law community, communion, also a law district' (Vigf.); cf. By-Law.

(The existence of **byjar-, bæjar-lög* in ON. is scarcely proved by the occurrence of *bæjar-lögmaðr* 'a town justice' in *Diplomat. Norvegicum* of 13-14th c. (Vigf.), as a 'by' might have its own *lögmaðr* 'lawman' without having its own special law.]

1. The local custom or 'law' of a township, manor, or rural district, whereby disputes as to boundaries, trespass of cattle, etc., were settled without going into the law courts; a law or custom established in such a district by common consent of all who held land therein, and having binding force within its limits. Hence *byrlaw-court* and Byrlaw-man, -grayve, q.v.

These laws regulated such matters as the dates of ploughing, the turning out of cattle, the number of cattle turned out by each tenant of common land, the fines for trespass and damage done to fences, etc., the keeping up of fences, sea banks, the pound, the 'balks' in fields, and the like.

[The bellman at Tollerton used to say] 'Aweay to t' Bahlaw' [*i.e.* to a parish meeting].

2. *transf.* A district having its own byrlaw court, or local law.

1850 *N. & Q.* Ser. I. II. 92/2 The above are the four byerlaws or divisions of the parish, and the Churchwardens used separately to collect in their respective byerlaws.

In the form *Bierlow* this word is common as an appendage to place-names in Yorkshire: *Brampton Bierlow, Eccleshall Bierlow, Brightside Bierlow.* These are the names of somewhat extensive parishes; it is to be presumed that the various hamlets forming each were originally connected by their resort to a district court of justice.

By-rlawman. Also **byerlaw-, birlaw-, berlaw-, byrelaw-**, and **Burley-**, q.v. [f. prec. + Man: cf. the Norse form there cited.]

An officer appointed at a Court-leet for various local duties, as the framing and execution of byrlaws, looking after nuisances, administration of justice in minor matters, arbitration in agricultural disputes, etc. etc. Also occas. called **Bierlaw-grayves** (see Grave).

1432 *Ingleby Arncliffe Manor Court Rolls* (per Rev. J. C. Atkinson) Juratores elegerunt in officium de Birlawmen John North et Rob. Phelipson. 1477-8 *Ibid.* Elegerunt Joh. Hardwyke et Joh. Jacson Bierlaw-grayves [explan. in Latin *custodes plebiscitii*] pro anno futuro, et jurati sunt. 1521 *Ibid.* That no bruester shall sell anie ale but according to the price of the cuntrie, and at the sight of the Bierlaymen. 1568 *Ibid.* That euerie one shall comme to the byerleys & other common workes after warning be gyven them eyther by constable or byerley men vpon payne of euerie defawte ivd. 1552-1584 *Manch. Court-leet Rec.* in *Athenæum*, 2 Aug. (1879) 146 Byrlamen, birlamen. 1598 *Ibid.*, Berlawmen [fined for suffering swine to go up and down the street unyoked]. 1592 *Acc. Common Lands Rotherham* ibid. 9 Aug., To the byer law-men for casting open closes according to our custome, *xs.* 1799 J. Robertson *Agric. Perth* 40 Sworn appraisers or valuers (called Byrelawmen)..are called mutually by each party, to settle disputes between landlord and tenants, or between one tenant and another. 1875 *Lanc. Gloss.* (E. D. S.) 62 *Burly-man*, an officer appointed at a court-leet to examine and determine respecting disputed fences.

This still survives locally in Scotland and the north of England under various forms, e. g. Bourlawman, Burleyman (also *burlie bailie*), Birleyman, q.v. for further examples.
